

Supplementary Figure Legend

Supplementary Figure 1. Group differences in network scores.

Network scores in the PD group were significantly reduced in the anterior cingulate

(IC4, $p = 0.02$), cerebellar lobule VII (IC36, $p = 0.04$) or superior temporal gyrus (IC50,

$p < 0.05$) compared with the Ctr group. In contrast, network scores in the PD group

were significantly increased in cerebellar lobule VI (IC47, $p = 0.04$) or the inferior

frontal gyrus (IC66, $p = 0.04$) compared with the Ctr group. AC, anterior cingulate; CB,

cerebellum; CBN, cerebellar network; CCN, cognitive control network; Ctr, normal

control; DMN, default mode network; IFG, inferior frontal gyrus; Lt, left; PD,

Parkinson's disease; Rt, right; STG, superior temporal gyrus.
