

Supplementary Material: Mild Abiotic Stress Affects Development and Stimulates Hormesis of Hemp Aphid *Phorodon cannabis*

Roma Durak, Małgorzata Jedryczka, Beata Czajka, Jan Dampc, Katarzyna Wielgusz and Beata Borowiak-Sobkowiak

Table S1. The test of normality and analysis of variance.

Variables	Normality	p - value	Analysis of Variance	p-Value
SOD	0.953 ¹	0.086	2.908	0.357
CAT	0.951 ¹	0.073	3.157	0.571
β-Glucosidase	0.954 ¹	0.093	2.471	0.996
GST	0.960 ¹	0.151	6.756	0.818
PPO	0.959 ¹	0.139	3.889	0.298
POD	0.954 ¹	0.096	2.652	0.200
aphid population (3 days)	0.929 ¹	0.295	0.637	0.648
aphid population (5 days)	0.881 ¹	0.061	5.033	0.284
aphid population (7 days)	0.968 ¹	0.851	1.868	0.193
pre-reproduction	0.075 ²	0.133	182.620	0.470
reproduction	0.146 ²	0.138	43.511	0.893
post-reproduction	0.293 ²	0.144	95.038	0.938
longevity	0.066 ²	0.151	15.013	0.069
fecundity	0.059 ²	0.129	51.911	0.351

Test of normality: ¹Shapiro-Wilk test, ²Lilliefors test; Analysis of variance: Levene test.
