Table S3. Distribution of soil macrofauna families by trophic groups.

Feeding guild	Order	Family
Detritivores	Annelida	Lumbricidae
	Blattoptera	Ectobiidae
	Coleoptera	Hydrophilidae
	Diptera	Bibionidae, Heleomyzidae, Lauxaniidae, Lonchaeidae, Tipulidae, Trichoceridae
	Myriapoda	Julidae, Polydesmidae, Polyzonidae
Fungivores	Coleoptera	Latridiidae, Leiodidae
Herbivores	Coleoptera	Curculionidae
	Hemiptera	Cydnidae, Lygaeidae, Ortheziidae, Tingidae
	Lepidoptera	Hepialidae
Predators	Araneae	All families
	Coleoptera	Cantharidae
	Diptera	Asilidae, Empididae, Hybotidae, Muscidae, Rhagionidae, Therevidae
	Hemiptera	Ceratocombidae, Loriculidae
	Myriapoda	Lithobiidae
Combined*	Hymenoptera	Formicidae
	Diptera	Cecidomyiidae, Chironomidae
	Coleoptera	Carabidae, Cryptophagidae, Elateridae, Nitidulidae, Scarabaeidae, Staphylinidae

*For species-level information consult Data S1 (below).

Data S1. Characteristics of collected soil invertebrates (space-delimited file).

Metadata

Column 1: Year of data collection.

Column 2: Month of data collection.

Column 3: Locality (consult Table S1 for coordinates).

Column 4: Sample identifier (1 to 10).

Column 5: Soil horizon, from which invertebrates were extracted.

Column 6: Order or other higher-rank taxon.

Column 7: Family.

Column 8: Genus_species.

Column 9: Number of specimens.

Column 10: Dry weight (mg). Note: all spider individuals found in the same sample were weighed together.

As the result, in samples containing two or more species of spiders we were unable to divide total weight between species. In these situations we ascribed the total weight to the first identified species and zero weight to all other species.

Column 11: The species lives in/on soil (yes/no). Data on species, which do not live in soil, were excluded from all analyses.

Column 12: The species feeds in/on soil (yes/no). Data on species, which do not feed in soil, were excluded from the analyses of latitudinal pattern in biomass of individual feeding guilds.

Column 13: The species feeds with plant roots (yes/no).

Column 14: Proportion of weight attributed to phytophagy (0-1).

Column 15: Proportion of weight attributed to predation (0-1).

Column 16: Proportion of weight attributed to saprophagy (0-1).

Column 17: Proportion of weight attributed to mycophagy (0-1).

Column 18: Feeding guild. Data on species with unknown feeding habit were excluded from the analyses of latitudinal pattern in biomass of individual feeding guilds.
