

Table S2. List of specimens with 18S rDNA used for extraction and amplification during the present study. Their geographic origin, GenBank accession numbers, University of Opole sample numbers, and names of the persons who provided the specimens for analyses are provided. All newly sequenced specimens were identified to species by the first author (BAL). Acronyms for the persons who collected or/and provided the specimens for analyses are, as follows: AW (Andrzej Wolski, Institute of Biology, University of Opole, Opole, Poland), BL (Barbara Lis, Institute of Biology, University of Opole, Opole, Poland), MM (Miłosz Mazur, Institute of Biology, University of Opole, Opole, Poland), SK (Shin-ichi Kudo, Department of Biology, Naruto University of Education, Naruto, Tokushima, Japan).

Family	Subfamily	Tribe	Species/subspecies	Geographic origin (year collected, if originally provided)	GenBank accession numbers for 18S rDNA	University of Opole sample numbers for newly sequenced species (person who provided the specimen)
Tingidae	Tinginae	Acalyptaini	<i>Acalypta miyamotoi</i> Takeya, 1962	Japan (2011)	OR022068	T47 (SK)
