Figure S2. CIRCOS visualization of gene and transcript density compared PacBio SMRT sequences with *D. citri* reference genome for eight top lengths of scaffolds. A: Eight longest scaffolds schematic; B: Heat map of gene density distribution in the genome; C: Heat map of gene density distribution of PacBio SMRT sequences; D: Heat map of transcript density distribution in the genome; E: Heat map of transcript density distribution of PacBio SMRT sequences; F: Heat map of LncRNA density distribution on chromosomes.
