

Appendix S1

Results of the Welch's t test comparing the mean number of *Culex quinquefasciatus* and *Aedes aegypti* from biweeks 1 to 11 with and without the broken traps.

Cx. quinquefasciatus from Sanmin

Welch's t = -0.76472, df = 19.401, p-value = 0.4536

Cx. quinquefasciatus from Nanzih

Welch's t = 0.19923, df = 19.638, p-value = 0.8441

Ae. aegypti from Sanmin

Welch's t = -0.10598, df = 19.473, p-value = 0.9167

Ae. aegypti from Nanzih

Welch's t = 0.44631, df = 19.58, p-value = 0.6603
