

Supplementary materials for “Selective Extraction of Ni from Superalloy Scrap by Molten Mg-Zn”

1. Zn-Ni binary phase diagram

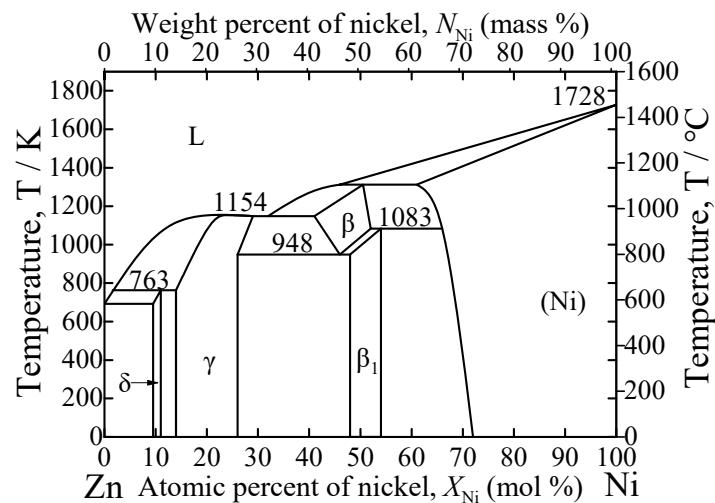

Figure S1. Zn-Ni binary phase diagram [1]. (This artwork is original and only data was used from the reference).

2. Mg-Ni binary phase diagram

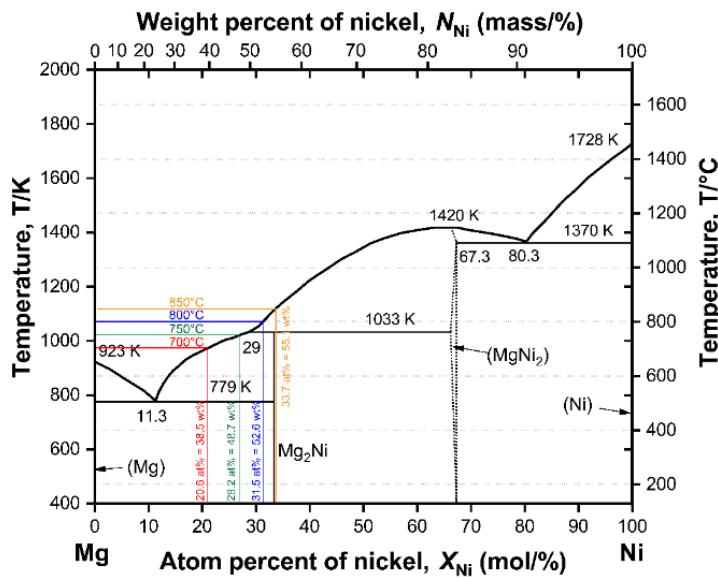

Figure S2. Mg-Ni binary phase diagram [2]. (This artwork is original and only data was used from the reference).

3. Mg-Zn binary phase diagram

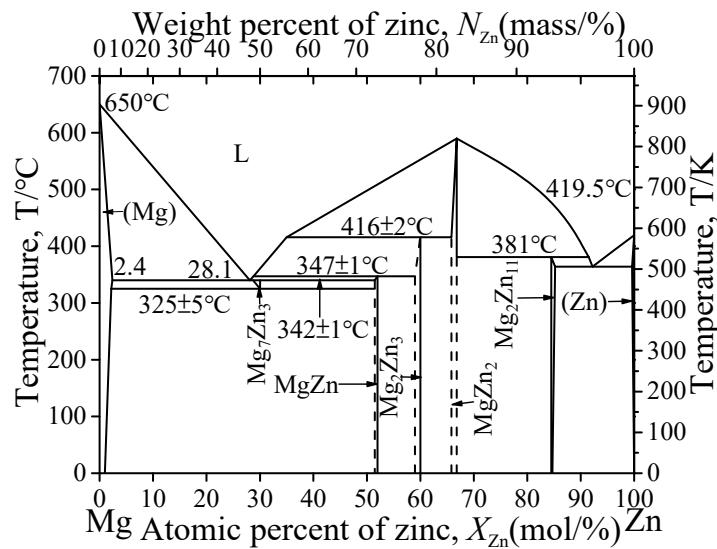

Figure S3. Mg-Zn binary phase diagram [3]. (This artwork is original and only data was used from the reference).

4. Vapor pressures of selected metals as a function of reciprocal temperature.

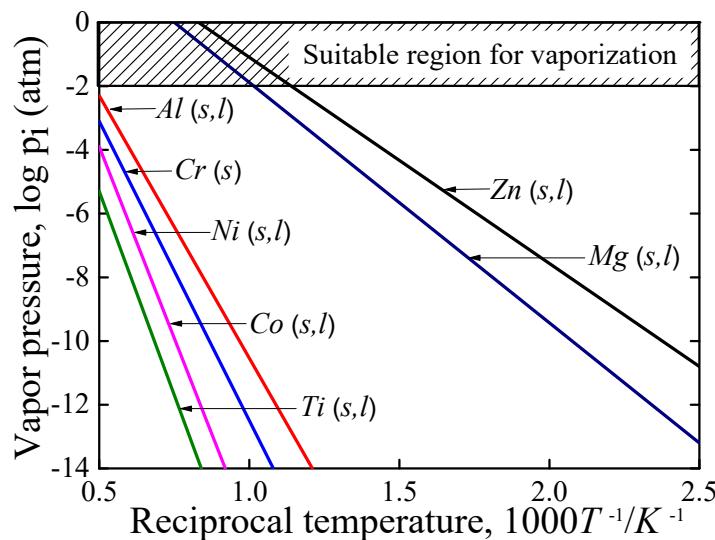

Figure S4. Vapor pressures of selected metals as a function of reciprocal temperature [4]. (This artwork is original and only data was used from the reference)

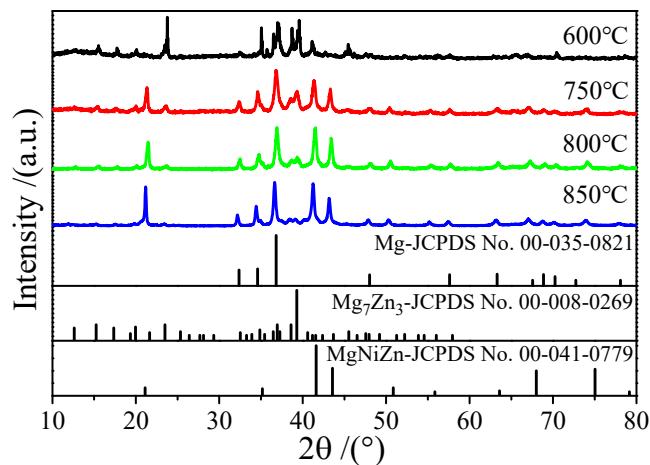

Figure S5. XRD patterns for Mg-Zn alloy of the samples under different heating temperature.

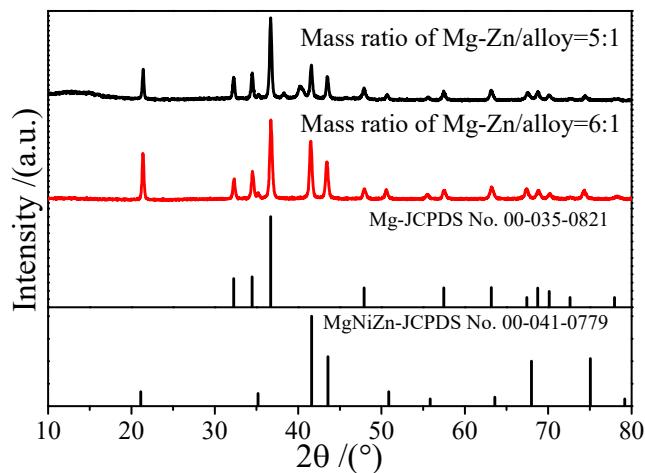

Figure S6. XRD patterns for Mg-Zn alloy of the samples under different mass ratio of Mg-Zn to superalloy.

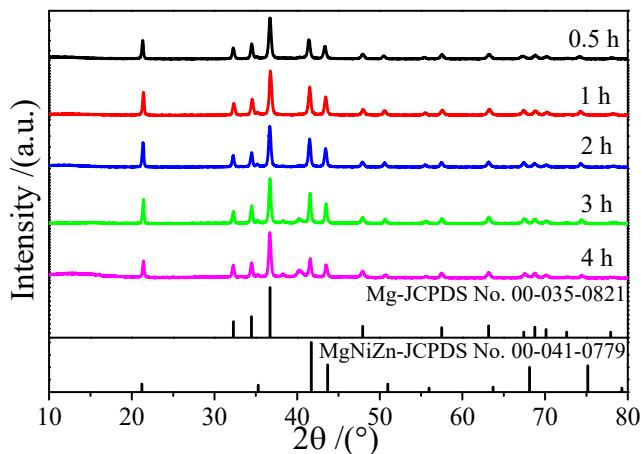

Figure S7. XRD patterns for Mg-Zn alloy of the samples under different heating time.
