KPC157	746	672

Supplementary Table S2. Cytokine's production of DCs. Equal amounts from three different cultures were pooled. US: unstimulated cultures.

Supplementary Figure S1. DCs were stained with a mixture of anti-CD83-FITC, anti-CD86-APC and anti-HLRA-DR-PE antibodies. Ten thousand events for each sample were acquired. US: unstimulated.

Supplementary Figure S2. Cytokine expression by DCs cultured in presence of live *K. pneumoniae* strains by heat-map analysis.
