								NH4	14.10	0.001

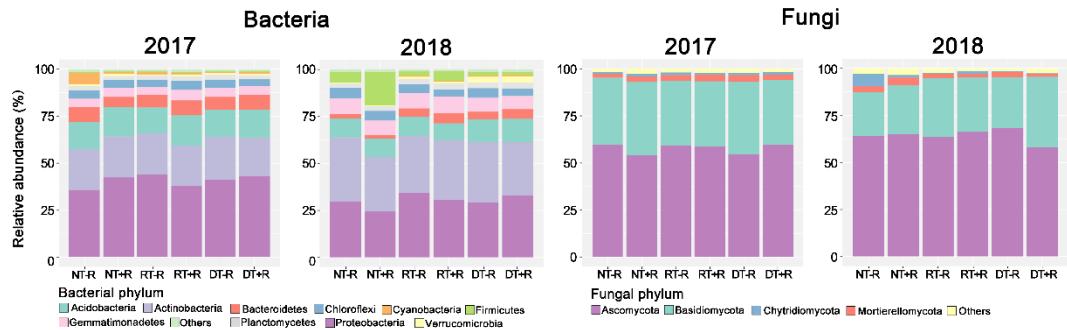

Figure S1. The relative abundance of the dominant bacterial (A) and fungal (B) phyla among treatments. Abbreviations: NT, no tillage; RT, rotary tillage; DT, deep tillage; -R, residue removal; +R, residue retention.

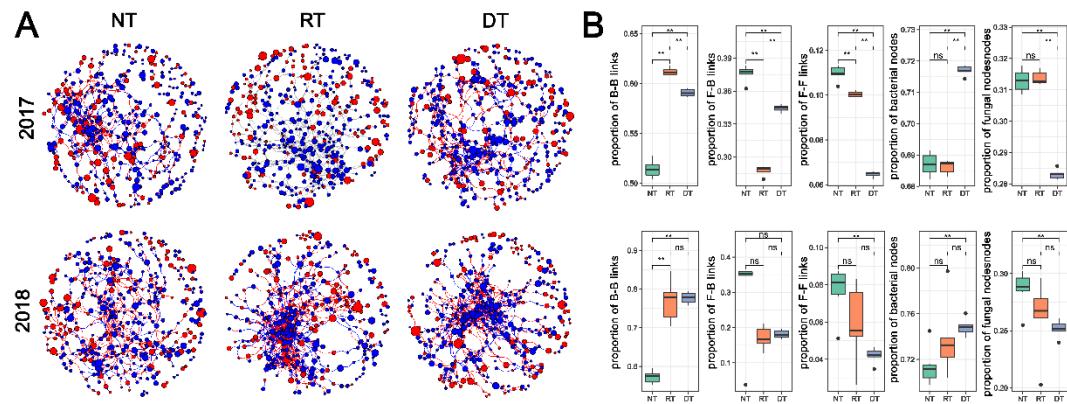

Figure S2. Co-occurrence networks of combined soil bacterial-fungal communities among treatments (A), proportion of bacteria-bacteria (B-B) links, fungi-bacteria (F-B) links, fungi-fungi (F-F) links, proportion of bacterial nodes and fungal nodes among treatments. The red and blue lines indicate positive and negative connections between the nodes, respectively. The size of each circle represents the relative abundance of each node. Abbreviations: NT, no tillage; RT, rotary tillage; DT, deep tillage.
