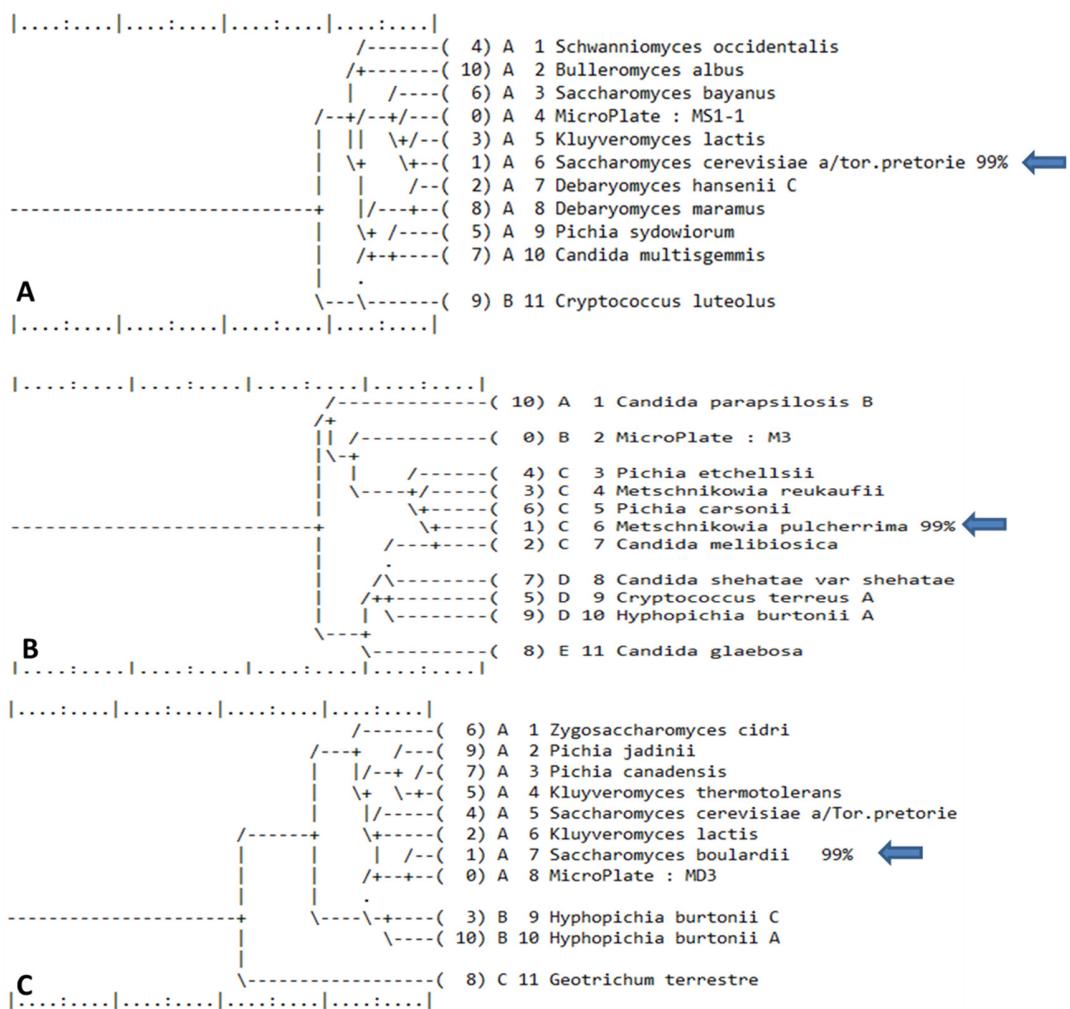

Figure S1. Appearance of the phenotypic phylogeny dendograms generated using the Biolog Microbial ID System (MicroStation™ System MicroLog version 4.2) for the strains: A- MS1-1; B-M3; C-MDR; whose percentage of similarity identified was >95%

Table S1. Metabolic profile obtained using Biolog Microbial ID System after 72 hours of incubation at 28°C

		M1	M3	MD3	MS1-1	M5
	Oxidation tests results					
1	Water	M	M	M	M	M
2	Acetic acid	S	-	-	-	-
