

Supplementary Materials

Microbial Synthesis of Lactic Acid from Cotton Stalk for Polylactic Acid Production

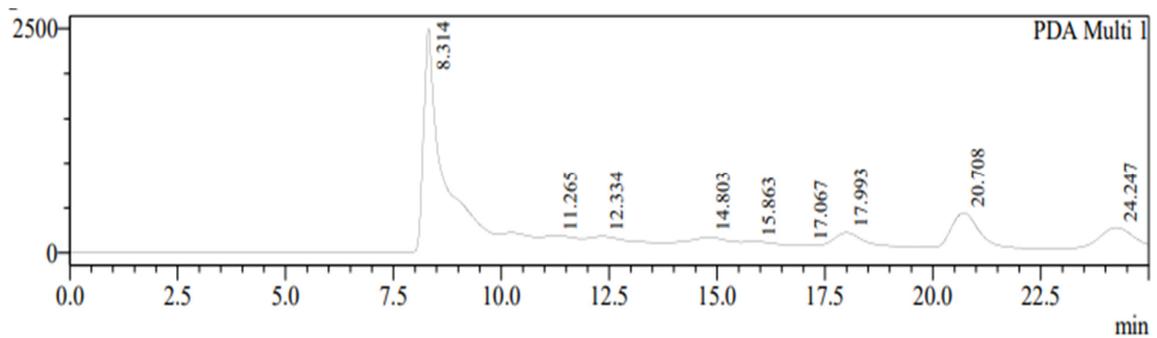

Glucose estimation using DNSA method of fermentation broth

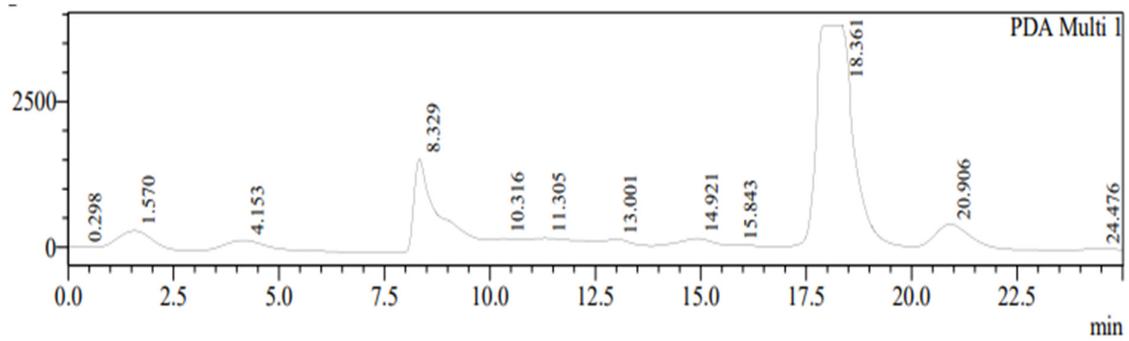

Supplementary Figure S1. Isolation of lactic acid bacteria.

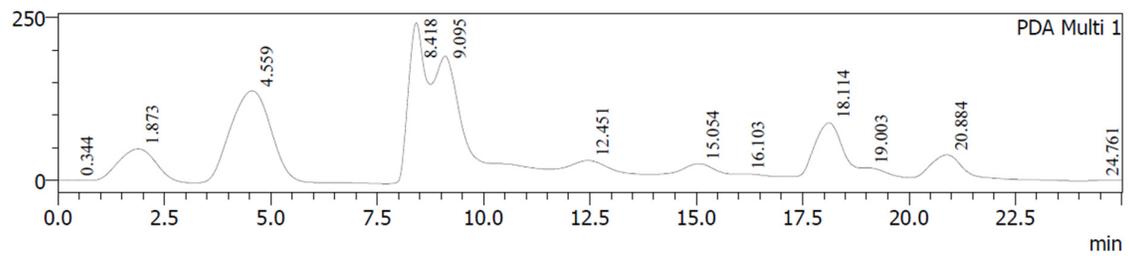

HPLC Chromatogram of LAB-2 isolate

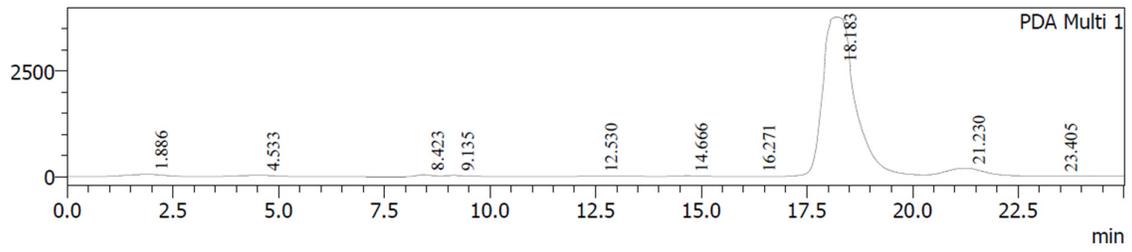

HPLC Chromatogram of LAB-3 isolate

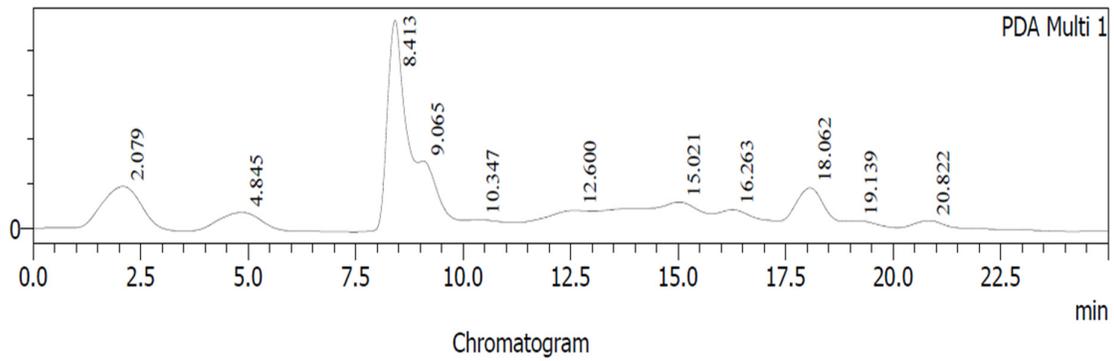

HPLC Chromatogram of LAB-4 isolate

HPLC Chromatogram of LAB-5 isolate

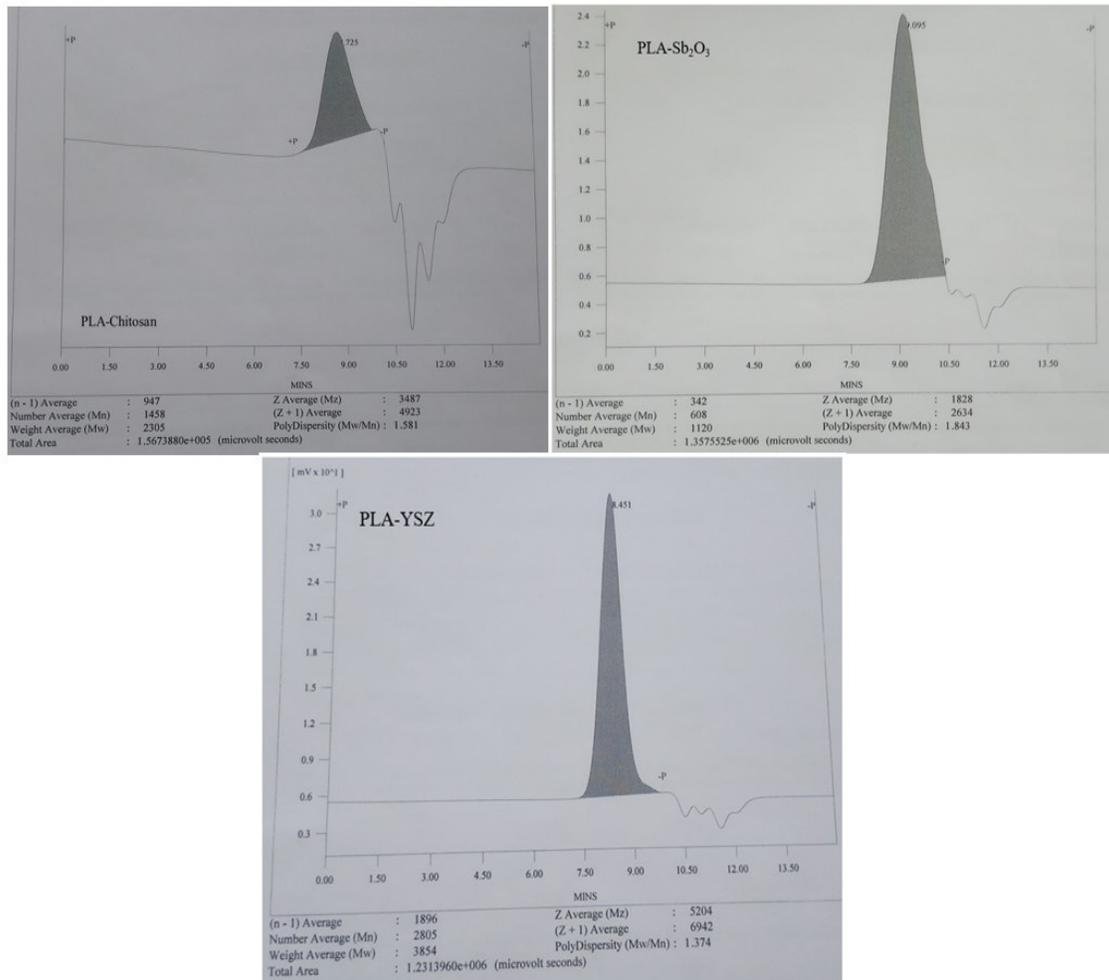

HPLC Chromatogram of LAB-6 isolate

HPLC Chromatogram of LAB-11 isolate

Supplementary Figure S2. HPLC profiles of lactic acid concentrations by isolates.

Supplementary Figure S3. GPC spectrum of resultant polymers i.e., PLA-Chitosan, PLA-Sb₂O₃, and PLA-YSZ.
