In the original publication [1], there was a mistake in Figure 2 as published [1]. In the bottom right part of the figure, the "Iron chelation" box points to another box indicating "Increasing levels of Fe^{2+} Fe^{3+}" in the published article. This box should instead state "Decreasing levels of Fe^{2+} Fe^{3+}".

The corrected Figure 2 appears below.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
