

1

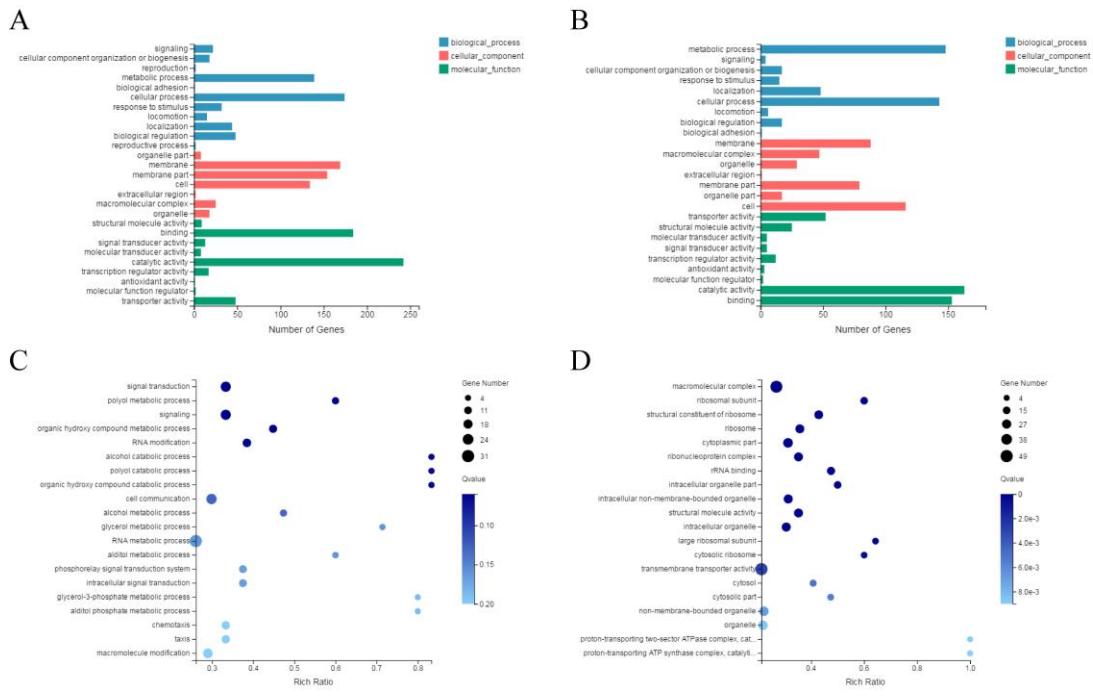

2 **Figure S1.** Sequence length distribution of *V. fujianensis* transcripts analyzed in this study.

3

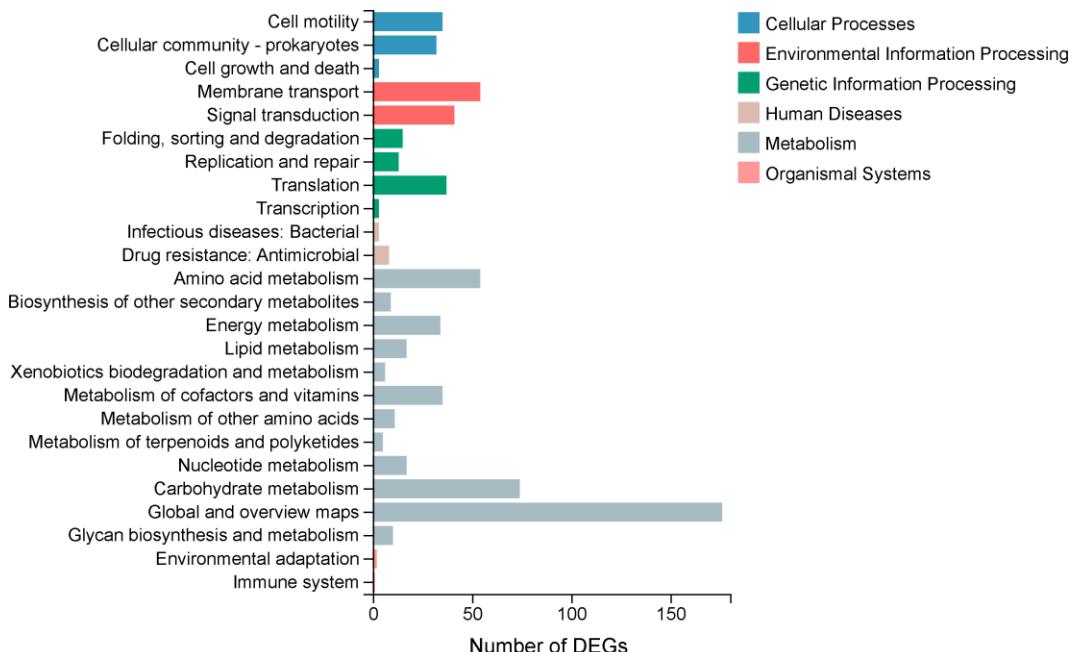

4

5 **Figure S2.** Differentially expressed genes (DEGs) cluster analysis of gene expression patterns
6 between the high-salt and low-salt condition. The red color indicates high relative expression,
7 and the blue color indicates low relative expression.

10 **Figure S3.** (A) Functional classification of gene ontology (GO) annotations of the
 11 up-regulated differentially expressed genes (DEGs). (B) Functional classification of GO
 12 annotations of the down-regulated DEGs. (C) Bubble charts of GO enrichment analysis of the
 13 up-regulated DEGs. (D) Bubble charts of GO enrichment analysis of the down-regulated
 14 DEGs. The x-axis corresponds to fold enrichment values while the y-axis indicates the top 20
 15 GO enriched terms. Size of the bubble indicates the number of significant genes in the given
 16 enriched term.

18

19 **Figure S4.** Functional classification of KEGG pathway of differentially expressed genes
20 (DEGs). The y-axis indicates the name of the KEGG metabolic pathways. The x-axis indicates
21 the number of the total DEGs annotated between high-salt and low-salt condition.

Table S1. Overview of 16S rRNA gene sequences of *Vibrio* species analyzed in this study.

No.	Species	Strain	Isolation Region	Isolation Source	Isolation Year	16S rRNA Accession
1	<i>Vibrio aerogenes</i>	ATCC 700797 ^T	China, Taiwan	Seagrass bed sediment	1993	AF124055
2	<i>Vibrio aestivus</i>	CECT 7558 ^T	Spain	Coastal seawater	2008	HE613734
3	<i>Vibrio aestuarianus</i>	ATCC 35048 ^T	USA	Oyster	-	X74689
4	<i>Vibrio agarivorans</i>	CECT 5085 ^T	Spain	Seawater	1996	AJ310647
5	<i>Vibrio albensis</i>	ATCC 14547	Elbe River	Fish	-	EF032499
