Note: 1. To avoid non-specific interaction between the aptamer and the cell surface, the BSA (100 mg/mL) and tRNA (10 mg/mL) as competitors were incubated with targeted cells. 2. Counter-selection: Aptamer library was incubated with *A. muciniphila*, *A. stercoricanis*, *R. intestinalis*, *B. producta*, and *R. microfusus*. 3. Target SELEX: Aptamer library was incubated with *P. distasonis*.
