

## Supplementary Material:

(A) (B) (C)

**Figure S1.** Inhibition of various clinical multidrug-resistant *S. aureus* strains by *Streptomyces* sp. YX44 fermentation broth. (A) multidrug-resistant *S. aureus* no. 957 (B) multidrug-resistant *S. aureus* no. 949 (C) multidrug-resistant *S. aureus* no. 867 were tested, the antibiotics resistant profile of tested strains are listed in Table S1.d

Pathogenic Strain	Resistant antibiotics
Multidrug-resistant <i>S. aureus</i> no. 957	Clindamycin, Oxacillin, Trimethoprim-Sulfamethoxazole
Multidrug-resistant <i>S. aureus</i> no. 949	Clindamycin, Oxacillin, Trimethoprim-Sulfamethoxazole, Daptomycin
Multidrug-resistant <i>S. aureus</i> no. 867	Oxacillin

**Table S1.** Antibiotic-resistant patterns of three clinical multidrug-resistant *S. aureus* strains.
