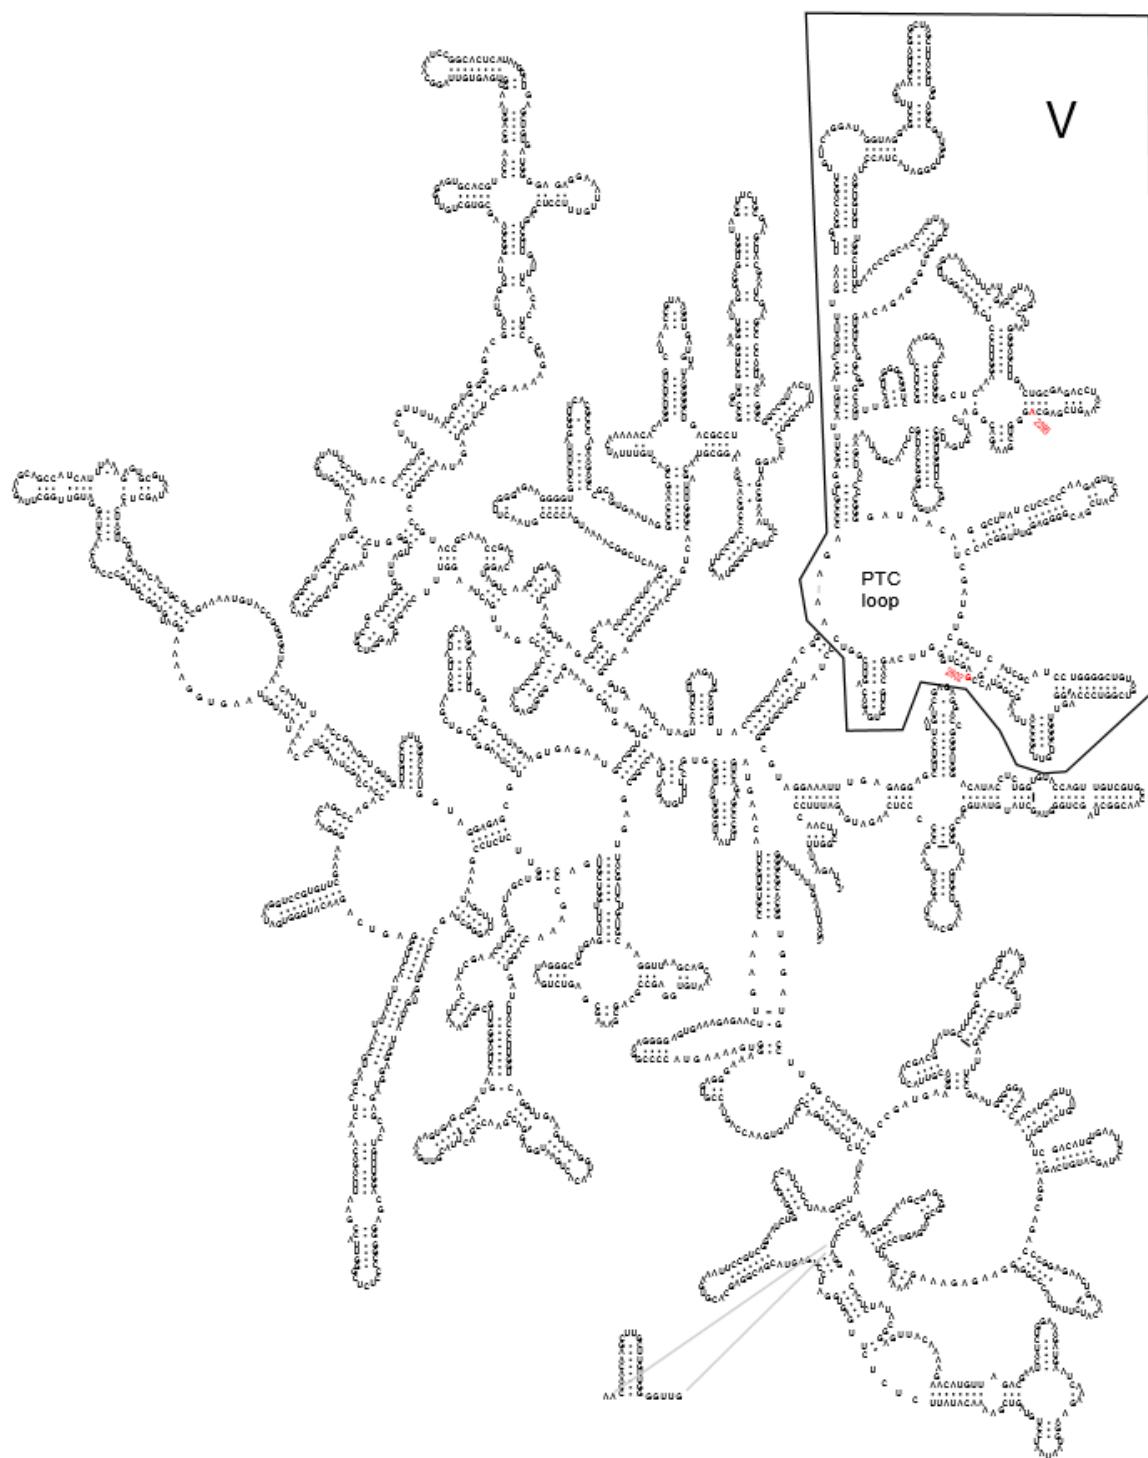

Figure S1. Novel mutations in the 23S rRNA region linked to linezolid resistance in *S. epidermidis*. Novel variants associated with linezolid resistance include A131G, G262U, G1256U, G1273A, and A2395AG. Interestingly, only insertion A2395AG maps into Domain V. The image was obtained from [RNACentral](#), domain V, target peptidyltransferase centre (PTC) loop, and mutations within the domain V were highlighted according to the [RNACentral Consortium](#).

Table S1. Overview of point mutations of the 23S rRNA and ribosomal protein L3 and L4 that were investigated.

Investigated point mutations associated with linezolid resistance	
Mutation of 23S rRNA (<i>E. coli</i> numbering)	A2062C, A2453C, A2453G, A2503G, A2503U, A2572U, C2452U, C2499U, C2534U, C2571G, C2612A, G2032A, G2032C, G2032U, G2061U, G2447U, G2505A, G2528U, G2576U, G2603U, G2608C, G2608U, U2132A, U2211G, U2357A, U2500A, U2500C, U2504A, U2504C, U2504G
Mutation of 23S rRNA (<i>S.aureus</i> numbering)	G2603U
Mutation of the ribosomal protein L3	V96D, Q136L, G137D, G137S, G139R, H146P, H146R, F147I, F147L, F147Y, P151L, G152D, V154L, G155R, M156T, A157R, S158F, D159E, D159Y, M169L
Mutation of the ribosomal protein L4	N20S, A22T, K68Q, G71D, L108S, A133T, V155I

Table S2. Number of valid data for general, laboratory and clinical parameters collected. Percentages are given in brackets.

Parameters	Numbers and percentage of valid values
General parameters	
Date of sampling	130 (100.00)
Gender	130 (100.00)
Age	130 (100.00)
Weight	112 (86.15)
Laboratory parameters	
ASAT	128 (98.46)
ALAT	128 (98.46)
γGT	128 (98.46)
CRP	129 (99.23)
PCT	60 (46.15)*
Clinical parameters	
Ward	130 (100.00)
Duration of hospitalization	130 (100.00)
Source of Isolate	129 (99.23)
Linezolid use	108 (83.08)
Antimicrobial treatment	127 (97.69)
Death	130 (100.00)

ASAT: aspartate transaminase; ALAT: alanine transaminase; γGT: gamma-glutamyltransferase;

CRP: C-reactive protein; PCT: procalcitonin

*excluded from further statistical analysis

Table S3. Results of variant calling identified potential single nucleotide polymorphisms (SNPs) within 23S rRNA mutations causing resistance to linezolid in *Staphylococcus epidermidis*.

SNPs	Number of respective SNPs within 12 Isolates with unknown Resistance Mechanisms	Total Number of respective SNPs within 129 Isolates
AE015929.1594723.1597555:A131G	1	9
AE015929.1594723.1597555:G2602U	0	12
AE015929.1719192.1722024:C1596U	3	27
AE015929.1719192.1722024:G1914A	0	3
AE015929.1719192.1722024:G2602U	1	86
AE015929.1808510.1811337:G262U	0	64
AE015929.1808510.1811337:G1256U	1	10
AE015929.1808510.1811337:G1273A	4	81
AE015929.1808510.1811337:G2597U	0	15
AE015929.2332749.2335580:A2395AG	12	56
