Figure S1. YoeB_{ss} expression had no significant effect on *S. suis* growth in liquid media. The SC19/pSET2-P*copA-yoeB_{ss}* and SC19/pSET2 strains were grown in the absence (A) and presence of 0.5 mM CuSO₄ (B). At least three independent experiments were performed; the data shown are the means \pm SDs from three wells in a representative experiment.
