|                                  | <i>D</i> | 4.0 $\pm$ 0.04             | 337 | 4.0 $\pm$ 0.04  | 93  | 0.244                 |

<sup>1</sup>The predicted means and standard error of those means were derived from the GLMMs. Cow age (age of the cow in years), herd and days in milk (DIM; being the integer number of days from the commencement of lactation for each individual cow), were fitted to the models as fixed effects.

<sup>1</sup>SCFA = Short Chain Fatty Acid, MCFA = Medium Chain Fatty Acid, LCFA = Long Chain Fatty Acid, PUFA = Polyunsaturated Fatty Acid, MUFA = Monounsaturated Fatty Acid.

<sup>2</sup>The predicted means and standard error of those means were derived from the GLMMs. Cow age (age of the cow in years), herd and days in milk (DIM; being the integer number of days from the commencement of lactation for each individual cow) were fitted to the models as fixed effects.
