

Supplementary Figure S1. Minitransition Feeder used to deliver gruel creep feeds

Supplemental Figure S2. Video-recorded feeding behavior of suckling pigs supplemented with insoluble or soluble gruel creep feed observed at 14 and 23 days of age. Means represent the time that piglets occupied feeder space, $n = 6$ litters/diet. ^{a, b, c} Bars within an age lacking a common superscript differ, $p < 0.05$.

Supplementary Table S1. Cytokine levels in piglets fed soluble or insoluble gruel creep feed diets, measured before (D22) and after weaning (D31) compared with non-creep-fed controls¹

Items (pg/ml)	Treatment						<i>P > F</i>			
	Control		Insoluble		Soluble		SEM	Trt ²	Age	T X A ³
