PD whole tree	95.63 ^a	96.61 ^a	88.93 ^b	88.68 ^b	98.75 ^a	96.24 ^a	0.87	0.000
Shannon-wiener	5.36 ^a	4.37 ^b	4.61 ^b	4.63 ^b	5.18 ^a	5.08 ^a	0.07	0.000

Data with different small letter superscripts within the same row were significantly different (*p* < 0.05). NFP, normal feeding period; SP, starvation period; RFP1, 1st week of refeeding period; RFP2, 2nd week of refeeding period; RFP3, 3rd week of refeeding period; RFP4, 4th week of refeeding period. SEM: standard error of the mean.

Table S2. Effects of starvation and prolonged refeeding on the relative abundances of ruminal bacteria (%) at the genus level in yaks.

The significantly changed predominant genera populations (abundance > 0.5% in at least one of the groups) were shown. Data with different small letter superscripts within the same row were significantly different ($p < 0.05$). NFP, normal feeding period; SP, starvation period; RFP1, 1st week of refeeding period; RFP2, 2nd week of refeeding period; RFP3, 3rd week of refeeding period; RFP4, 4th week of refeeding period. SEM: standard error of the mean.

Table S3. Effects of starvation and prolonged refeeding on the relative abundances of predominant microbial metabolic pathways (%).
