Text Correction

There was an error in the original publication. The number after L1-MP, “116.0°” need to be corrected.

A correction has been made to Section 3.1, Paragraph 3, Lines 5–6:

The maxillary incisors showed normal inclination, while the mandibular incisors were proclined (U1-SN, 105.7°; L1-MP, 82.0°) (Figure 10, Table 2).

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has al-so been updated.
