### PHOTOGRAPHS

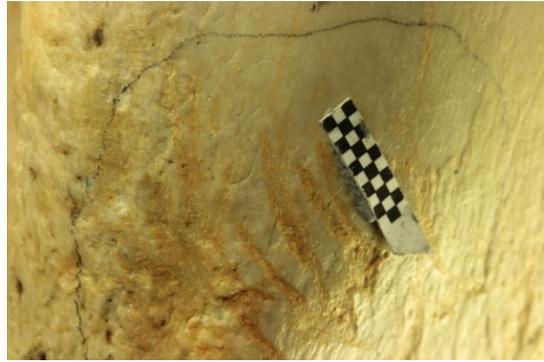

### 3D MODELS

**Figure S1.** Tooth scores carried out by the lion used for the study. Photographs and 3D models are shown.

### PHOTOGRAPHS

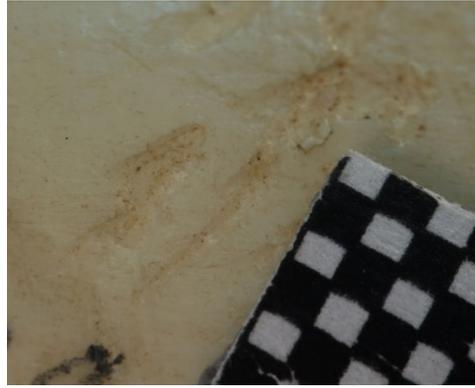

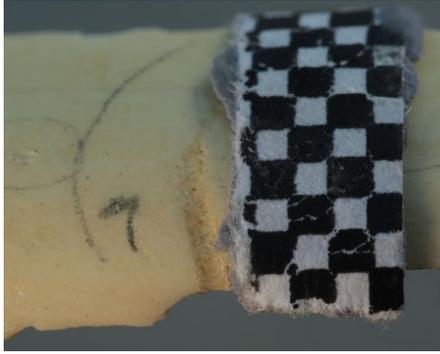

### 3D MODELS

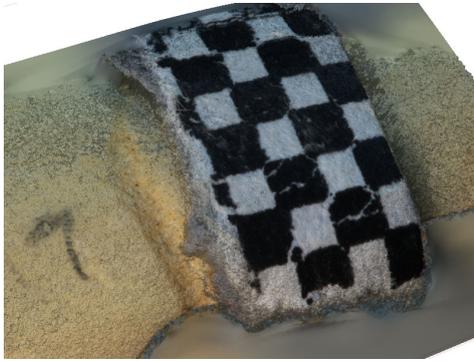

**Figure S2.** Tooth scores carried out by the spotted hyena used for the study. Photographs and 3D models are shown.

### PHOTOGRAPHS

### 3D MODELS

**Figure S3.** Tooth scores carried out by the brown hyena used for the study. Photographs and 3D models are shown.

### PHOTOGRAPHS

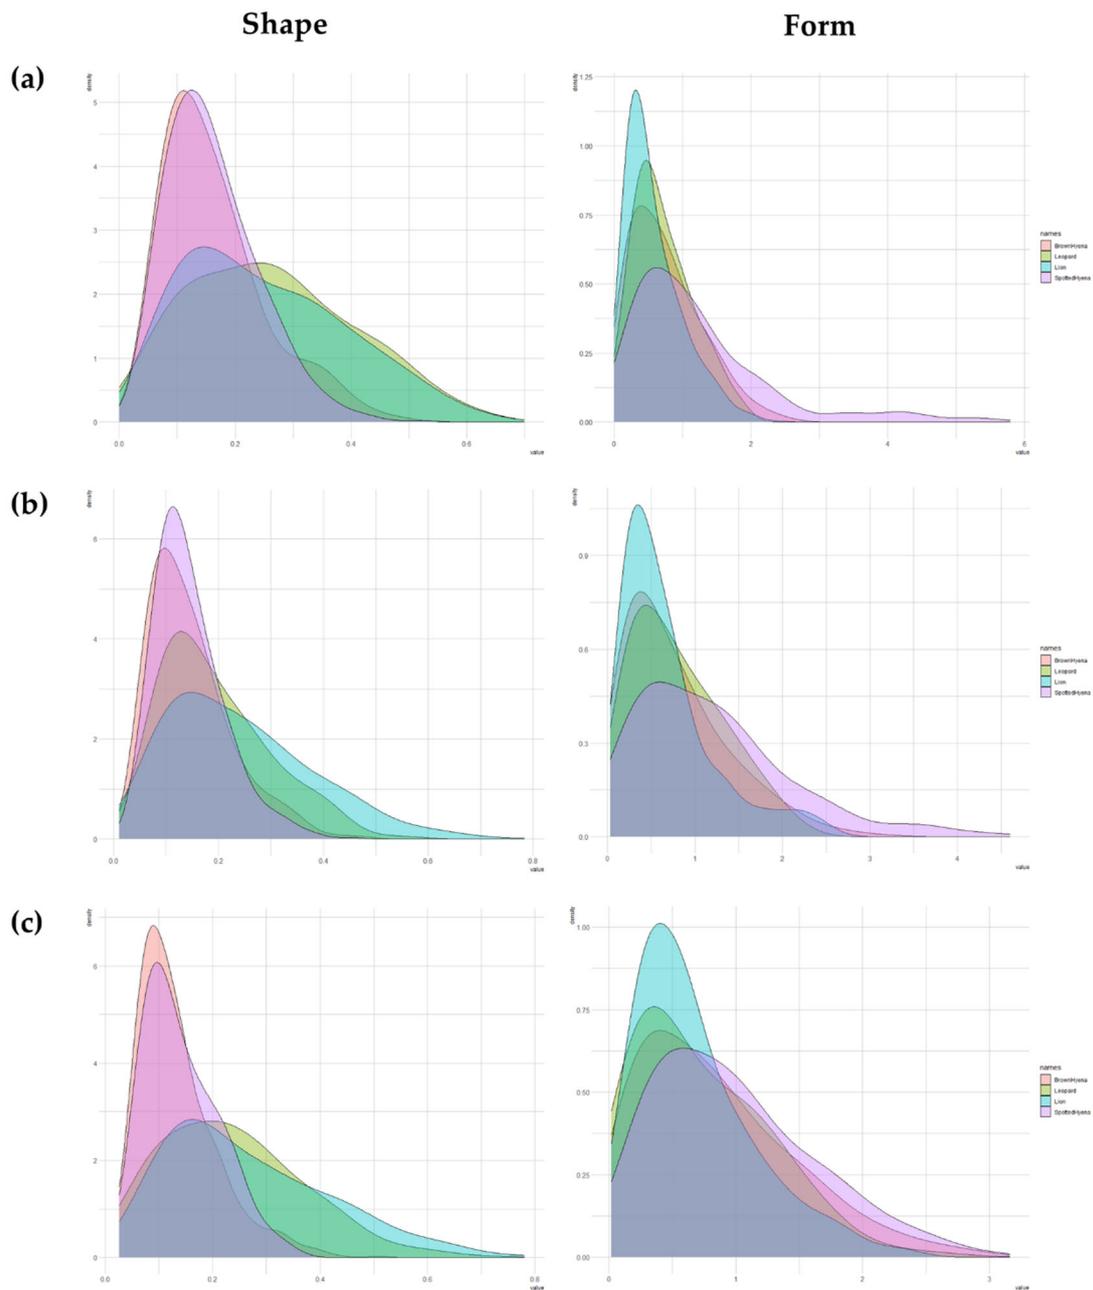

### 3D MODELS

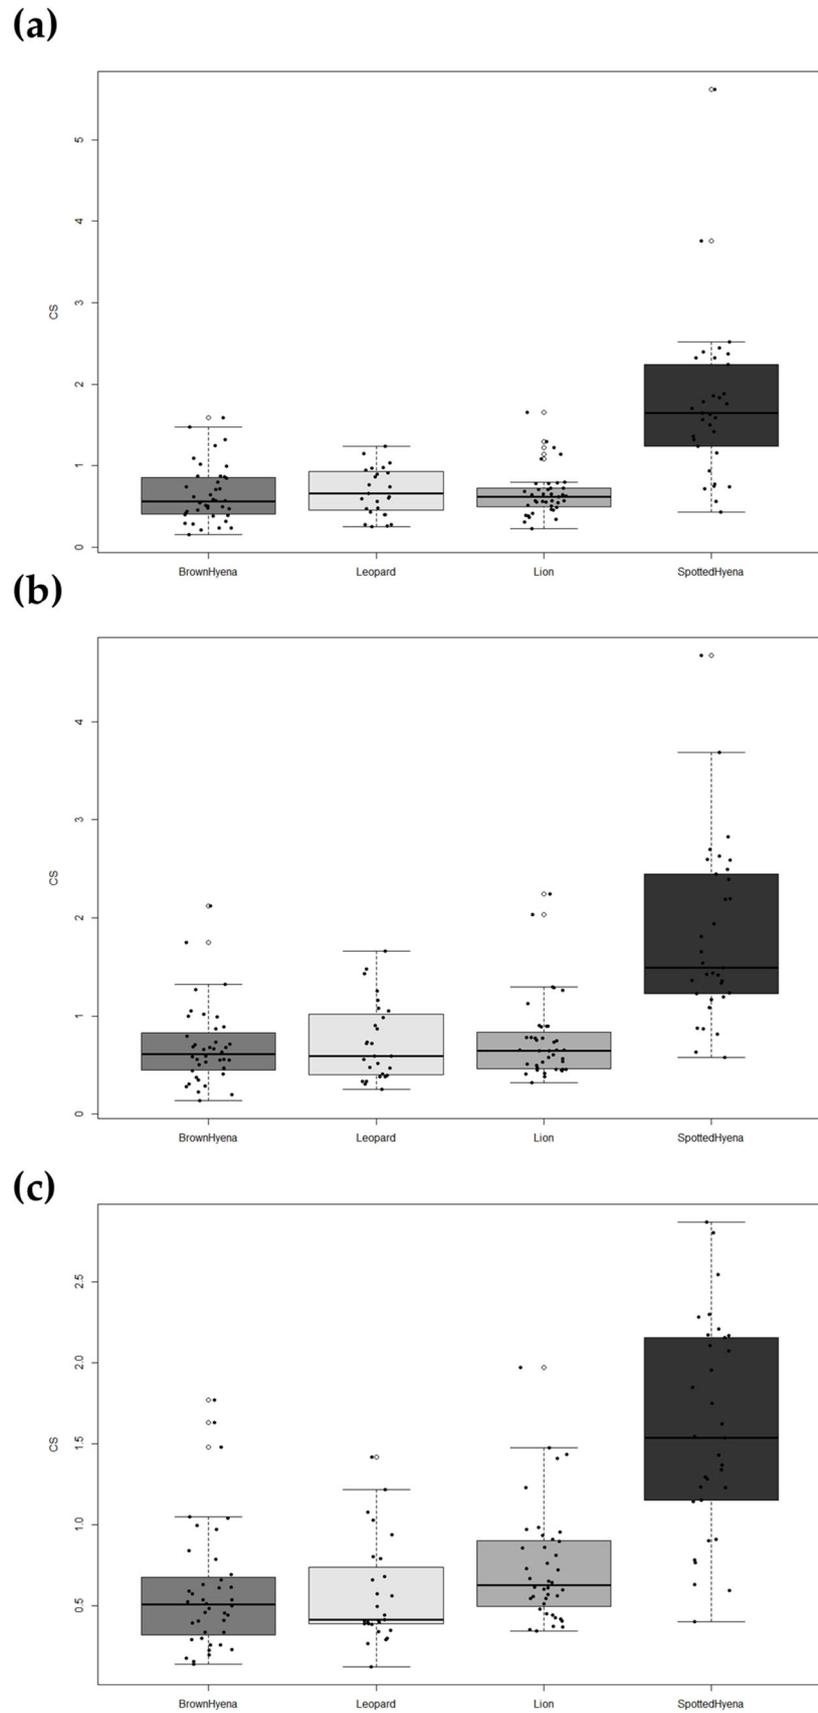

**Figure S4.** Tooth scores carried out by the leopard used for the study. Photographs and 3D models are shown.

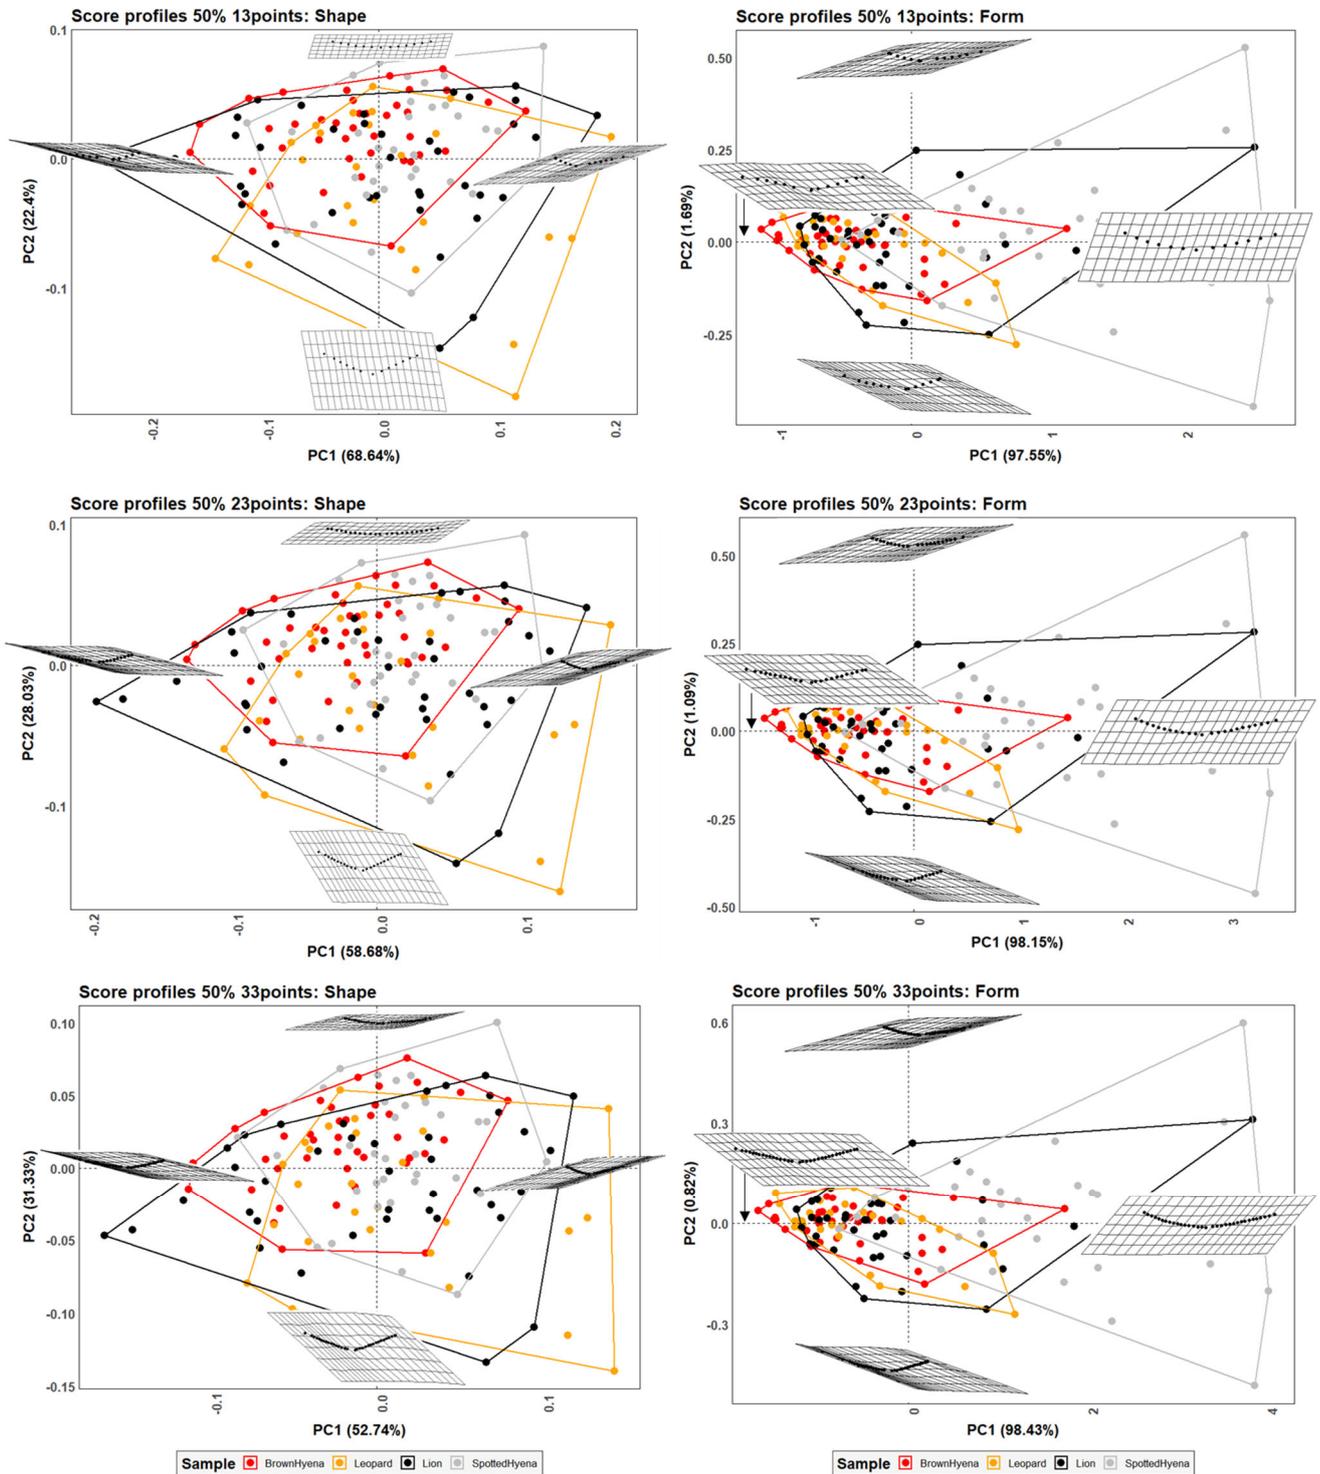

## Procrustes distances

**Figure S5.** Procrustes distances calculated for the four carnivore groups in shape and form space using the 7-landmark model to characterize the score cross-section at (a) 35% score length; (b) 50% score length; and (c) 65% score length.

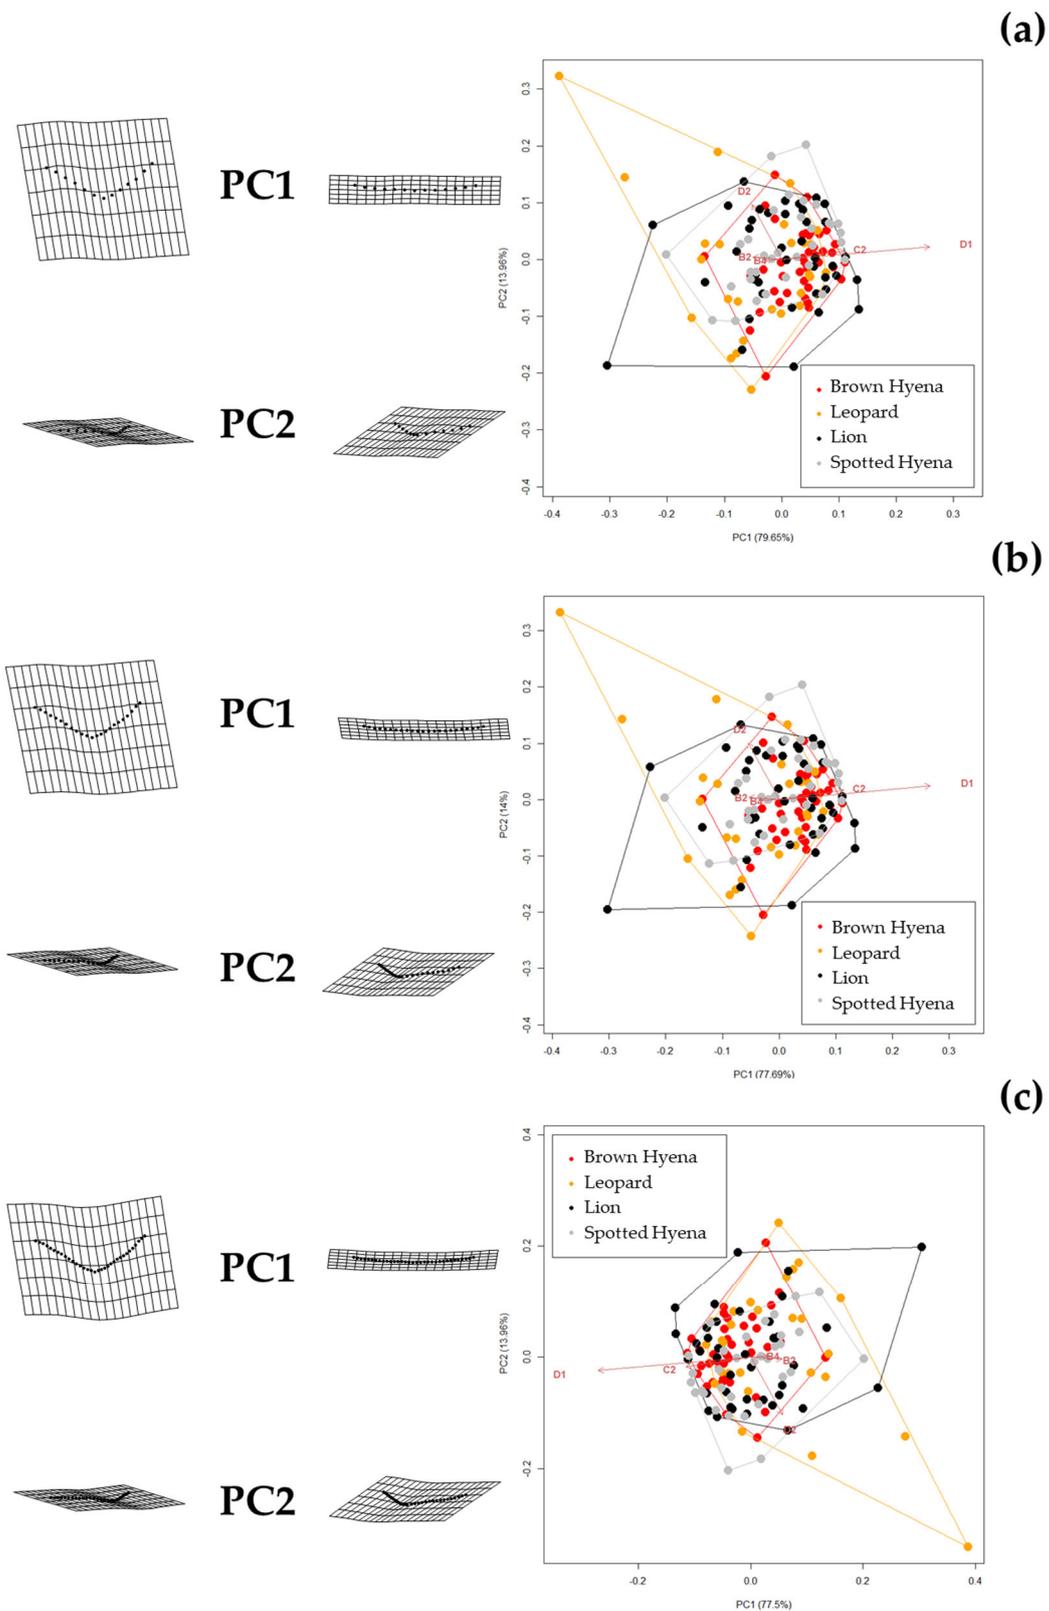

**Figure S6.** Centroid Size of the carnivore scores included in the present study based on the cross-sections taken at (a) 35% score length; (b) 50% score length; and (c) 65% score length.

**Figure S7.** PCA plots in shape and form space on the 2-curves semilandmark models at 50% cross-sectional score length, using 13 points; 23 points; and 33 points. Extreme changes in shape and form along PC1 and PC2 are illustrated with the aid of transformation grids.

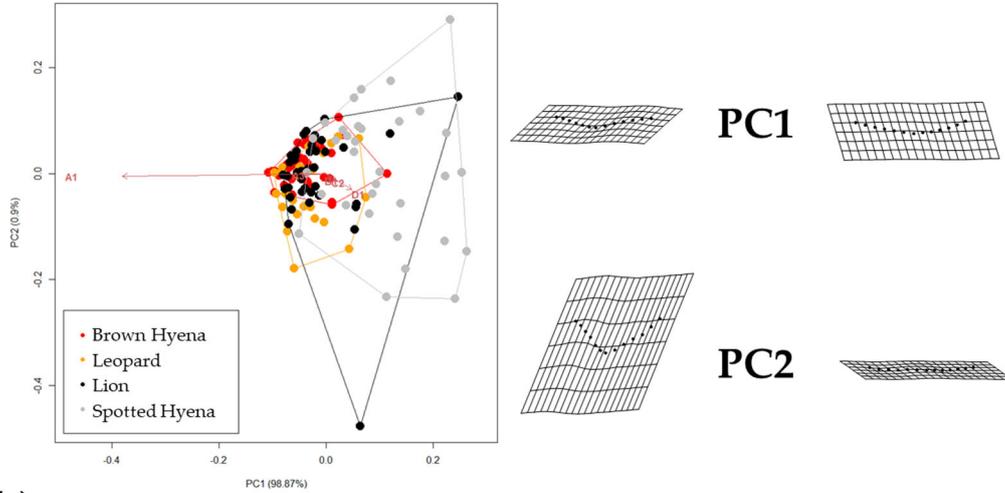

## Fourier Analysis at 50% score length; Shape space

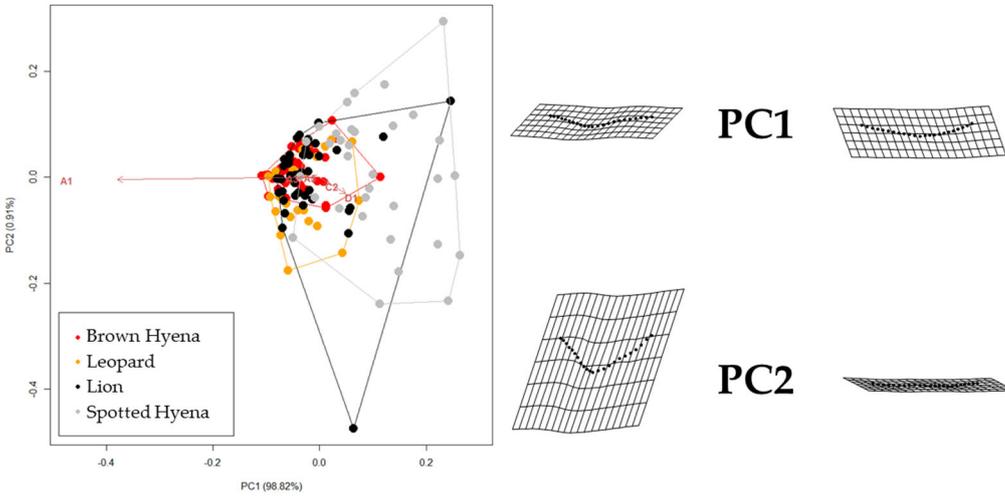

**Figure S8.** Shape PCA plots on Elliptic Fourier Analysis on the 2-curves semilandmark models at 50% cross-sectional score length, using (a) 13 points; (b) 23 points; and (c) 33 points. Extreme changes in shape along PC1 and PC2 are illustrated with the aid of transformation grids. Optimal harmonics for each model are (a) 4; (b) 6; (c) 6.

## Fourier Analysis at 50% score length; Form space

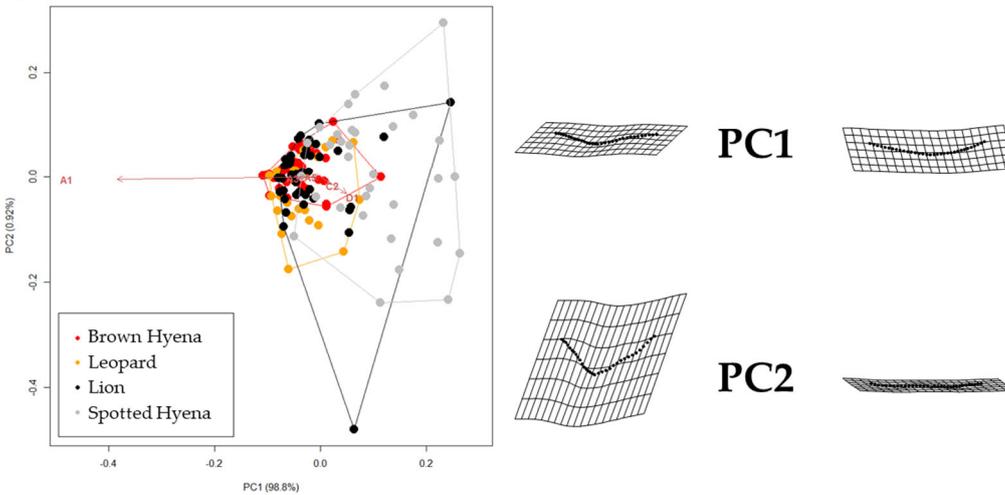

(a)

(b)

(c)

**Figure S9.** Form PCA plots on Elliptic Fourier Analysis on the 2-curves semilandmark models at 50% cross-sectional score length, using (a) 13 points; (b) 23 points; and (c) 33 points. Extreme changes in form along PC1 and PC2 are illustrated with the aid of transformation grids. Optimal harmonics for each model are (a) 4; (b) 6; (c) 6.

**Table S1.** MANOVA results obtained on the 13, 23 and 33 semilandmark models on two curves used to describe the cross-sections at 50% of the score length, using a EFA approach

semilandmark models on 2 curves at 50% cross-sectional length - EFA
