Raw scores are reported (SD between parentheses). **HP: high-performing participants to the Reading the Mind in the Eyes Test; LP: low-performing participants to the Reading the Mind in the Eyes Test**; MMSE: Mini Mental State Examination, RAVLT: Rey Auditory Verbal Learning Test, B.A.D.A (Batteria per l'Analisi dei Deficit Afasici), RTs: Reaction Times. *p-value related to the t-tests comparing high- and low-performing subgroups into each experimental elderly group. Values in bold indicate significant difference (Bonferroni corrected for the number of comparisons: $p < 0.006$ for clinical scales, $p < 0.008$ for memory and language and $p < 0.005$ for attentional and executive functions evaluations). Cut-off scores according to Italian normative data are reported.
