Figure S1: Sense and antisense probe showing the absence of signal in sense probe. Transverse section of the glomerular nucleus showing in (A) the absence of staining in the glomerular nucleus and diencephalon with the sense probe (SP6) against NTRK1/NTRKA in young animals; (B) the NTRK1/NTRKA labeling with antisense probe (T7) in the same brain area of young animals. Scale bar = 50 μ .
