

Figure S1

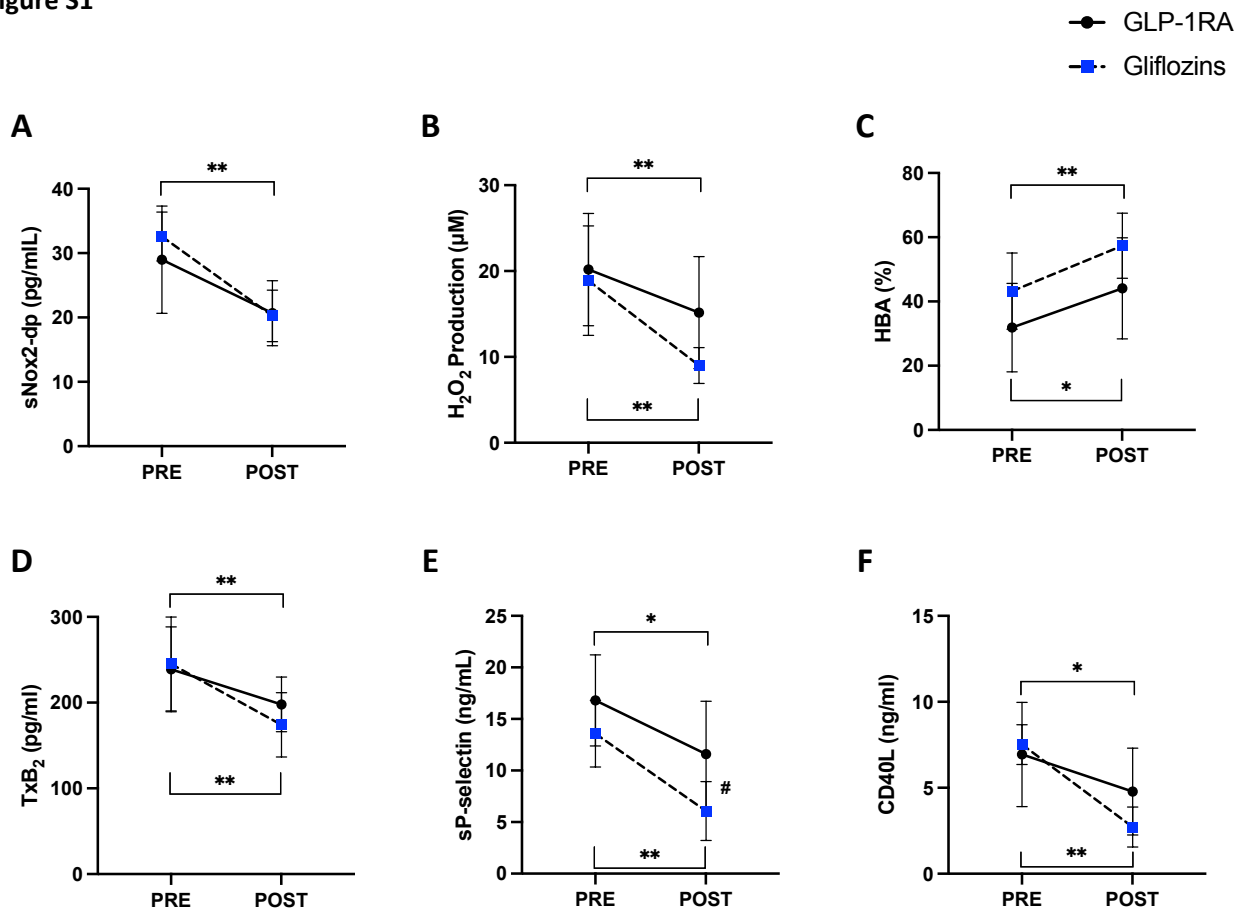

Figure S1. (a) Serum soluble NOX2-derived peptide (sNOX2-dp), (b) serum H₂O₂, and (c) blood HBA (d) thromboxane B₂ production, (e) soluble P-selectin levels and (f) soluble CD40 ligand before and 15 days after administration of GLP-1RA (n=8) or Gliflozins (n=8) in patients not taking acetylsalicylic acid (ASA) and all on statin therapy. Data are expressed as mean±SD. Intra- group significance: *p<0.01; **p<0.001; inter-group significance: # p<0.05.
