Table S1. Recipe of control bread and breads fortified with different fractions of milk thistle oilseed cake flour.

Ingredient	Amount of ingredients (%)	
	Control bread	Breads with 10 % of milk thistle oilseed cake flour fractions*
Sorghum flour	23.20	20.88
Corn flour	11.60	10.44
Corn starch	5.80	5.22
Potato starch	5.80	5.22
Tapioca starch	5.80	5.22
Guar flour	0.52	0.47
Milk thistle oilseed cake flour fractions	0	5.27
Sunflower oil	2.32	2.32
Salt	0.81	0.81
Dried yeasts	0.58	0.58
Water	43.56	43.56

*10 % of gluten-free flour blend was replaced by different milk thistle oilseed cake flour fractions: unsieved, coarse, medium and fine fraction.

Table S2. Settings of multiple reaction monitoring acquisition mode of mass spectrometer for determination of silymarin complex.

Compound	Precursor ion (<i>m/z</i>)	Product Ion (<i>m/z</i>)	Fragmentor voltage (V)	Collision energy (eV)	Cell accelerator voltage (V)	LOD ($\mu\text{g/ml}$)	LOQ	Calibration curve linear range (ng/ml)	Calibration curve correlation coefficient (R^2)
Taxifolin	303	285	135	8	4	0.0001	0.0004	7.8 – 125.0	0.999
Silychristin	481	325	135	20	4	0.0011	0.0036	31.3 – 1000.0	0.993
Silydianin	481	151	135	20	4	0.0005	0.0017	7.8 – 250.0	0.997
Silybin A	481	301	135	20	4	0.0006	0.0020	61.9 – 989.6	0.998
Silybin B	481	301	135	20	4	0.0010	0.0033	252.6 – 1010.4	0.999
Isosilybin A	481	125	135	30	4	0.0014	0.0047	20.5 – 657.1	0.998
Isosilybin B	481	125	135	30	4	0.0002	0.0008	10.7 – 342.9	0.999

LOD = limit of detection, LOQ = limit of quantification; LODs and LOQs were calculated according to this formula: $\text{LOD, LOQ} = x = \frac{k \times \sigma}{S}$, where *k* is 3 or 10 for LOD or LOQ, respectively, σ is the baseline noise of the blank solution chromatogram and *S* is the slope of the calibration curve.

Table S3. Energy profile (%) in control bread and breads with unsieved, coarse, medium and fine milk thistle oilseed cake flour.

Total energy represented by specific nutrient (%)	Fraction added to bread				
	Control	Unsieved	Coarse	Medium	Fine
Crude protein	7.8±0.4 ^D	9.5±0.3 ^C	9.0±0.3 ^C	10.1±0.2 ^B	12.7±0.2 ^A
Crude fat	15.3±1.0 ^D	18.9±0.6 ^{AB}	17.9±0.5 ^{BC}	17.7±0.1 ^C	19.8±0.4 ^A
Total insoluble fibre	2.4±0.8 ^C	4.9±0.4 ^{AB}	5.7±0.2 ^A	5.7±0.1 ^A	4.1±0.6 ^B
Nitrogen-free extract	74.6±0.5 ^A	66.7±0.3 ^B	67.4±0.1 ^B	66.5±0.3 ^B	63.4±1.2 ^C

Results are expressed as means ± standard deviation ($n = 3$); ^{A-D}Values with different superscripts within a row differ significantly ($p < 0.05$) based on Fisher's LSD test.

Figure S1. Pictures of crumb and crust of control gluten-free bread (A) and breads enriched with unsieved (B), coarse (C), medium (D) and fine (E) milk thistle oilseed cake flour fractions.
