Figure S1. Correlation between MPO peroxidase activity assessed by o-dianisidine test and MPO concentration assayed by ELISA in the supernatants of neutrophils incubated with stimulators in the absence of HSA-MG.

Blood smear 1 (scale bar is 10 μm)

Blood smear 2 (scale bar is 30 μm)

Figure S2. NET-like structures: (a) stained with Hoechst 33342 dye, fluorescent microscopy; (b) stained with Romanowsky dye, light microscopy.

Table S1. Comparison of mAbs against MPO used in study

mAb	Working combination for hemi-MPO detection with HRP-labeled mAb (tested mAb on solid phase)	Detection of dimeric MPO with same HRP-labeled mAb (tested mAb on solid phase)	Resistance of interaction with MPO to 2 M NaCl
1#8	2#7-HRP		
	4#2-HRP		
	4#4-HRP	+	+
	4#8-HRP		
	4#10-HRP		
2#7	1#8-HRP		
	4#2-HRP		
	4#4-HRP	+	-
	4#8-HRP		
	4#10-HRP		
4#2	1#8-HRP		
	2#7-HRP		
	4#4-HRP	+	-
	4#8-HRP		
	4#10-HRP		
4#4	1#8-HRP		
	2#7-HRP		
	4#2-HRP	No detection	-
	4#4-HRP		
	4#10-HRP		
4#8	1#8-HRP		
	2#7-HRP		
	4#2-HRP	+	-
	4#4-HRP		
	4#10-HRP		
4#10	No working combinations	No detection	+

Note: For unambiguous characterisation of epitope specificity of solid-phase immobilized and labeled mAbs we used hemi-MPO and not MPO dimer, due to the fact that results obtained with MPO dimer in sandwich ELISA cannot be interpreted in a unique manner (in terms of epitope specificity of mAbs).

Table S2. Comparison of ABTS and CB oxidation in absence and presence of HSA and HSA-MG (n = 3)

Reaction mixture	ABTS oxidation – A_{414}/min (1 mM ABTS, 5 nM HRP, 2 mM H ₂ O ₂ , 50 mM Na- acetate buffer, pH 5.5)	CB oxidation – $\mu\text{M HOCl}$ (200 μM CB, 25 μM HOCl, 150 mM NaCl, 2 mM taurine, 10 μM KI, 20 mM Na-phosphate buffer, pH 5.8)
Control	0.996 ± 0.031	24.8 ± 0.4
500 nM HSA	1.019 ± 0.042	25.1 ± 0.3
500 nM HSA-MG	1.004 ± 0.029	24.9 ± 0.4

Table S3. Comparison of neutrophil functional activity in type 2 diabetes mellitus and the effects of HSA-MG on neutrophils in vitro (see articles [1–9])

Functional activity of neutrophil	Type 2 diabetes mellitus	HSA-MG (this study)
Expression of CD11b	Increased [1–3]	Increased
Expression of CD63, exocytosis of AGs	No effect [4]	No effect
MPO chlorinating activity	Decreased [5,6]	Inhibition
Lum-CL	No effect [5]	No effect
Luc-CL, NADPH-oxidase activity	Increased [6–9]	Increased
NETosis	No effect [4]	No effect
