

Figure S1. Expression levels of NLRP3 inflammasome and IL-1 $\beta$ . The cardiac mRNA relative levels of NLRP3 inflammasome (Figure S1) Groups are NN: normobaric normoxia (n=6) and IHH: intermittent hypobaric hypoxia (N=6). Data are expressed in mean  $\pm$  SEM. Significant differences ( $p \leq 0.05$ ): \* vs. N.
