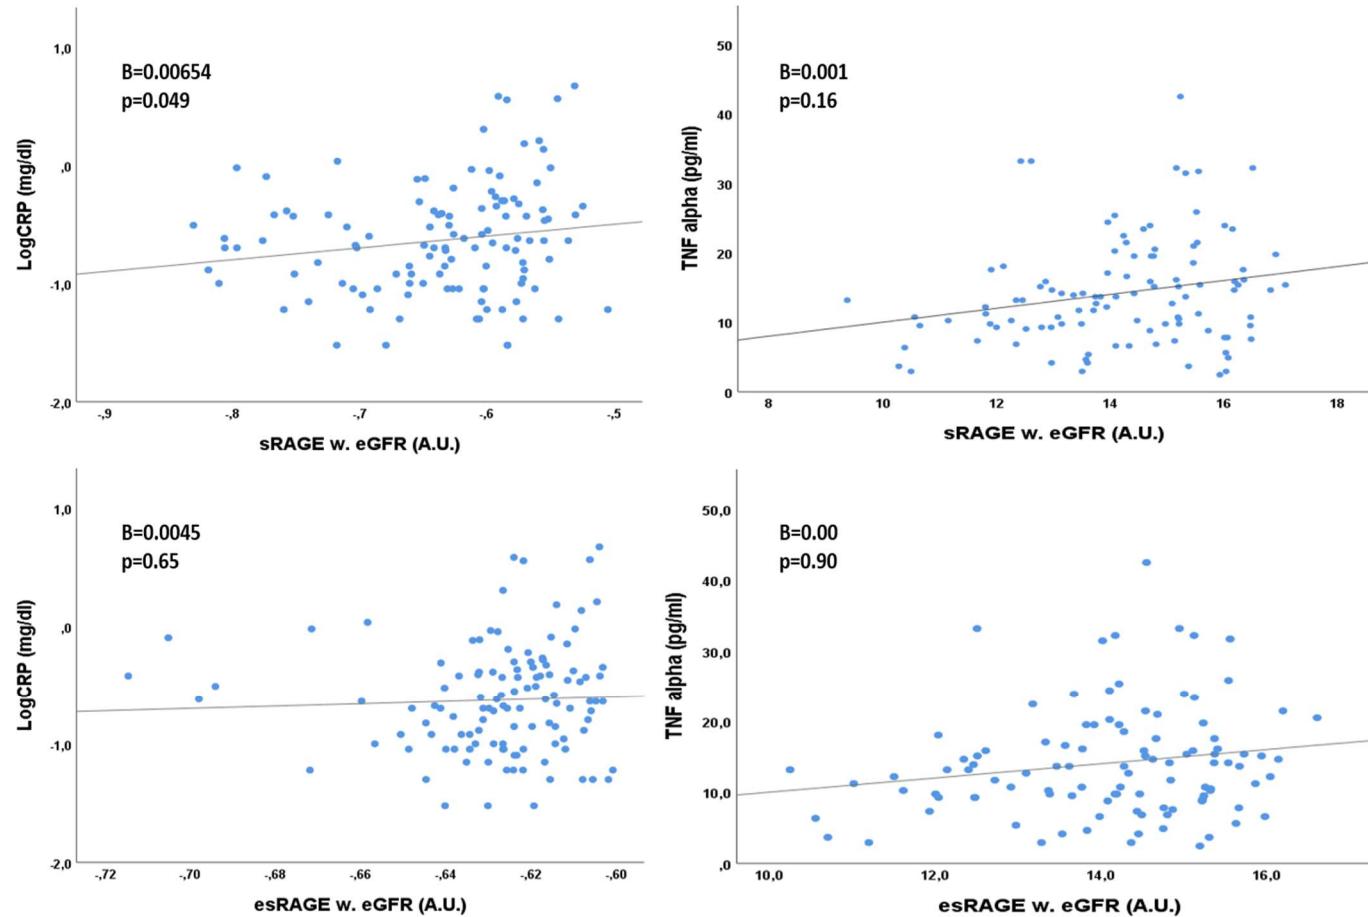

Figure S1: linear regression analyses evaluating the association between sRAGE and esRAGE with markers of inflammation weighted for eGFR.

Note: CRP: c-reactive protein; TNF α : tumor necrosis factor α ; sRAGE: sRAGE, soluble receptor for AGE; esRAGE: endogenous secretory receptor for AGE; eGFR: estimated glomerular filtration rate.

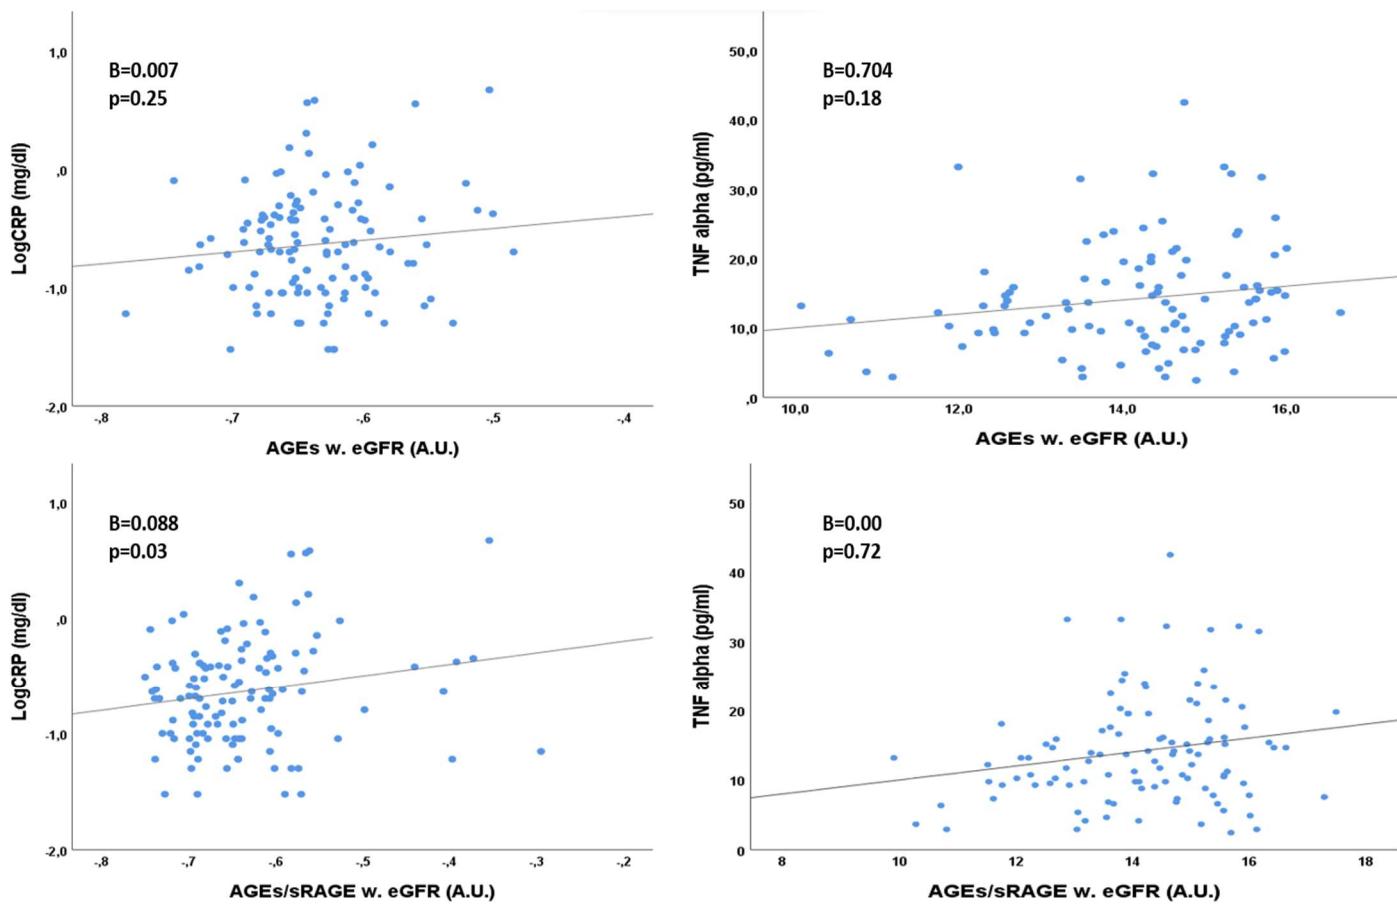

Figure S2: linear regression analyses evaluating the association between AGE and AGEs/sRAGE ratio with markers of inflammation, weighted for eGFR

Note: CRP: c-reactive protein; TNF α : tumor necrosis factor α ; AGEs: Advanced Glycation End products; sRAGE, soluble receptor for AGE; eGFR: estimated glomerular filtration rate.

Table S1: linear correlation comparison between body composition parameters and AGEs and RAGEs isoforms levels.
