

Supplementary materials

Table S1. Information of *PAO* and *RBOH* genes for phylogenetic analysis. Different lowercase letters indicated that the values were significantly different among different treatments ($p < 0.05$).

Table S2. List of primers for qRT-PCR in this study.

Table S3. List of primers for plasmid construction in this study.

Table S4. List of genes involved in pepper AR formation.

Figure S1. Effects of KI, DMTU, MDL72527, 2-HEH or DPI on AR formation in pepper hypocotyls.

Figure S2. Effects of EBL on the activities of cytoplasmic PAO (CP-PAO) during AR formation in pepper hypocotyls.

Figure S3. Phylogenetic relationship, functional domains, and gene structure of *CaPAOs*. **(A)** Phylogenetic relationship among gene structures of *CaPAOs*. **(B)** Distribution of conserved functional domains in CaPAO proteins.

Figure S4. Phylogenetic relationship, functional domains, and gene structure of *CaRBOHs*. **(A)** Phylogenetic relationship among gene structures of *CaRBOHs*. **(B)** Distribution of conserved functional domains in CaRBOH proteins.

Figure S5. Domain structure and sequence alignment of CaRBOH proteins. **(A)** Schematic representation of the CaRBOH proteins with the respective functional domains, including EF-hands, transmembrane domains (TMs) and flavin adenine dinucleotide (FAD)-binding sites. **(B)** Sequence alignment of seven CaRBOH proteins. EF-hand domains are indicated by orange boxes. Conserved FAD-binding site are indicated by green box. Putative transmembrane domains predicted by TMHMM2.0 (<https://services.healthtech.dtu.dk/service.php?TMHMM-2.0>) are indicated by blue boxes.

Figure S6. Phenotypes of the VIGS seedlings. **(A)** The top- and side-view of the control (*TRV2:00*) and PDS-silenced pepper plants (*TRV2:PDS*). **(B)** The side-view of *CaPAO1*- and *CaRBOH*-silenced pepper plants.

Table S1. Information of *PAO* and *RBOH* genes for phylogenetic analysis
