

Figure S1. SDS-PAGE characterization of purified P[4], P[6], P[8]-VP4*. Lanes 1-3 represent the samples of purified P[6]-VP4*, P[8]-VP4*, P[4]-VP4* proteins respectively.

Figure S2. Standard curve of sandwich ELISA for P[4], P[6], P[8]-VP4*. Purified VP4* proteins were 1.5-fold serially diluted. The error bars represent the standard error of each group (n=3).
