

Supplementary Materials S4: Participant-level Raincloud Plots Showing Changes from Pre- to Post-intervention for Each Behavior

Figure S1: Participant-level raincloud plots showing changes from pre- to post-intervention for visual accessibility of language

Note. EL = Eye level

Figure S2: Participant-level raincloud plots showing changes from pre- to post-intervention for auditory accessibility of language

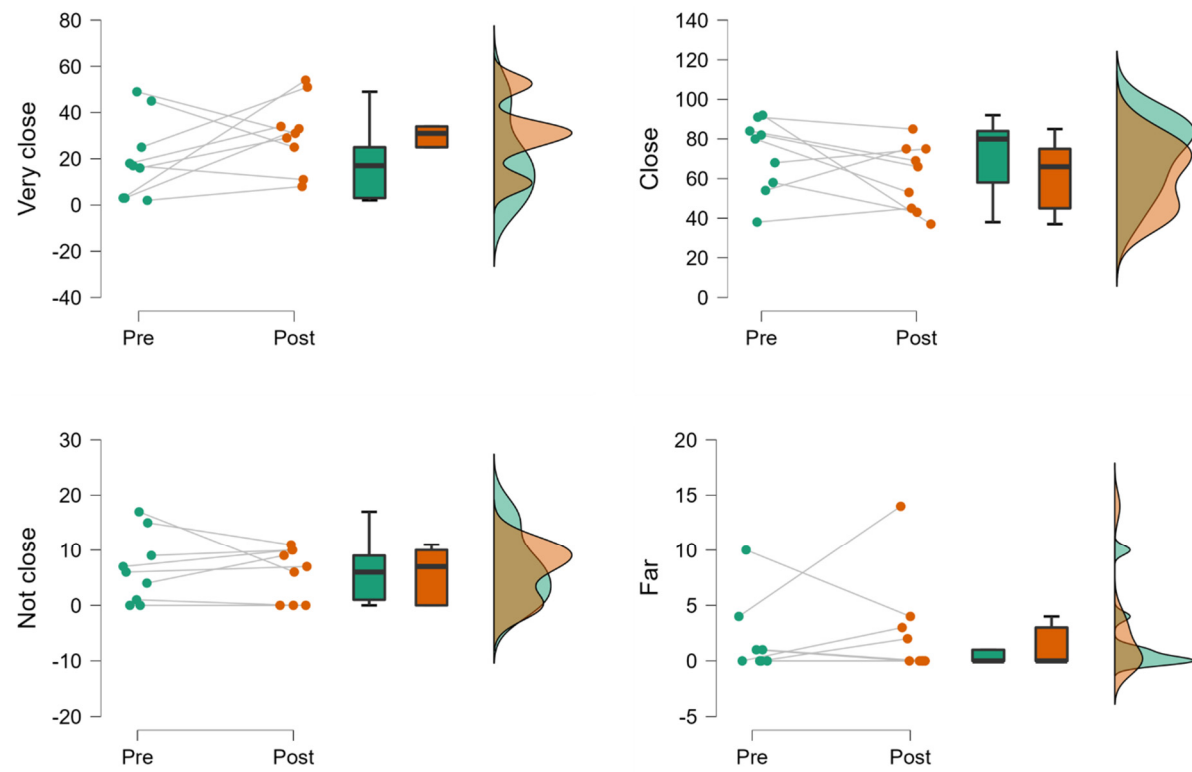

Figure S3: Participant-level raincloud plots showing changes from pre- to post-intervention for semantically contingent talk

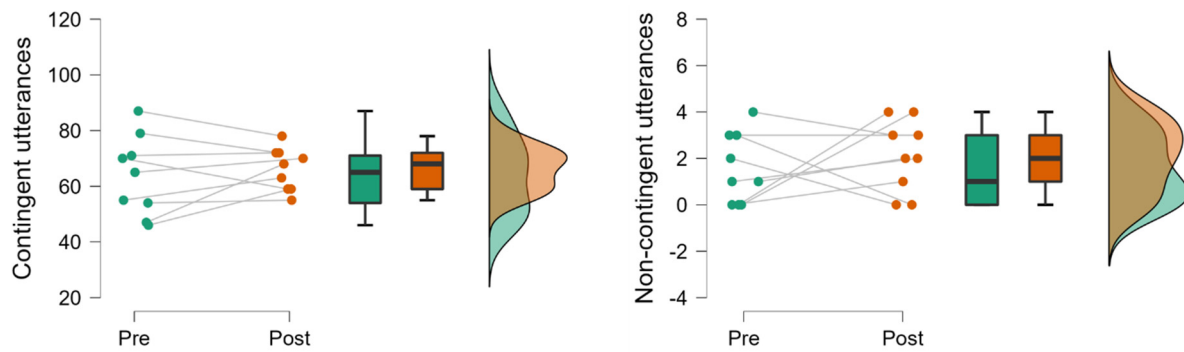

Figure S4: Participant-level raincloud plots showing changes from pre- to post-intervention for repetition in child directed speech

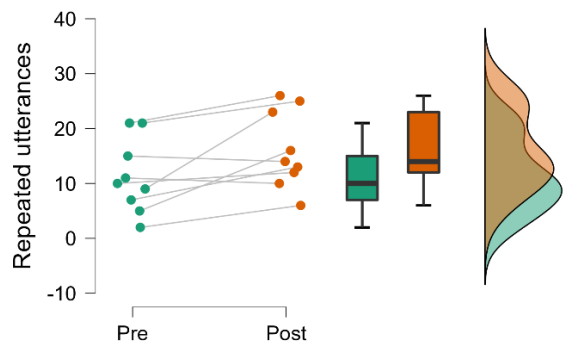

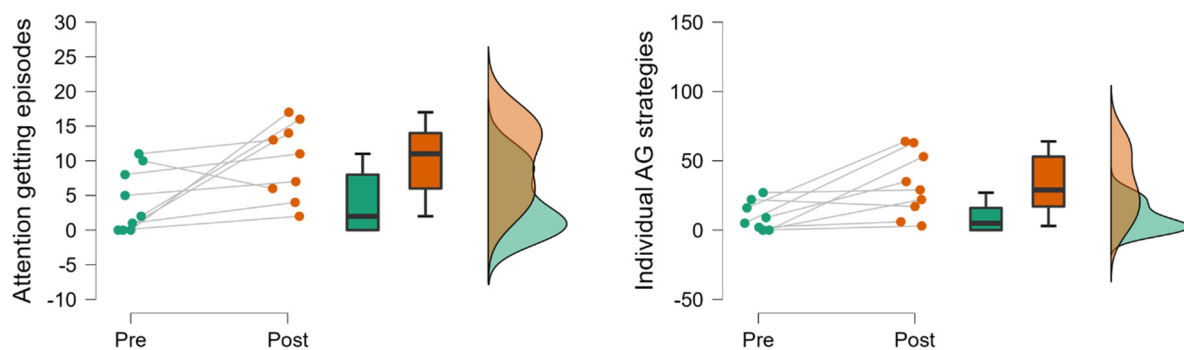

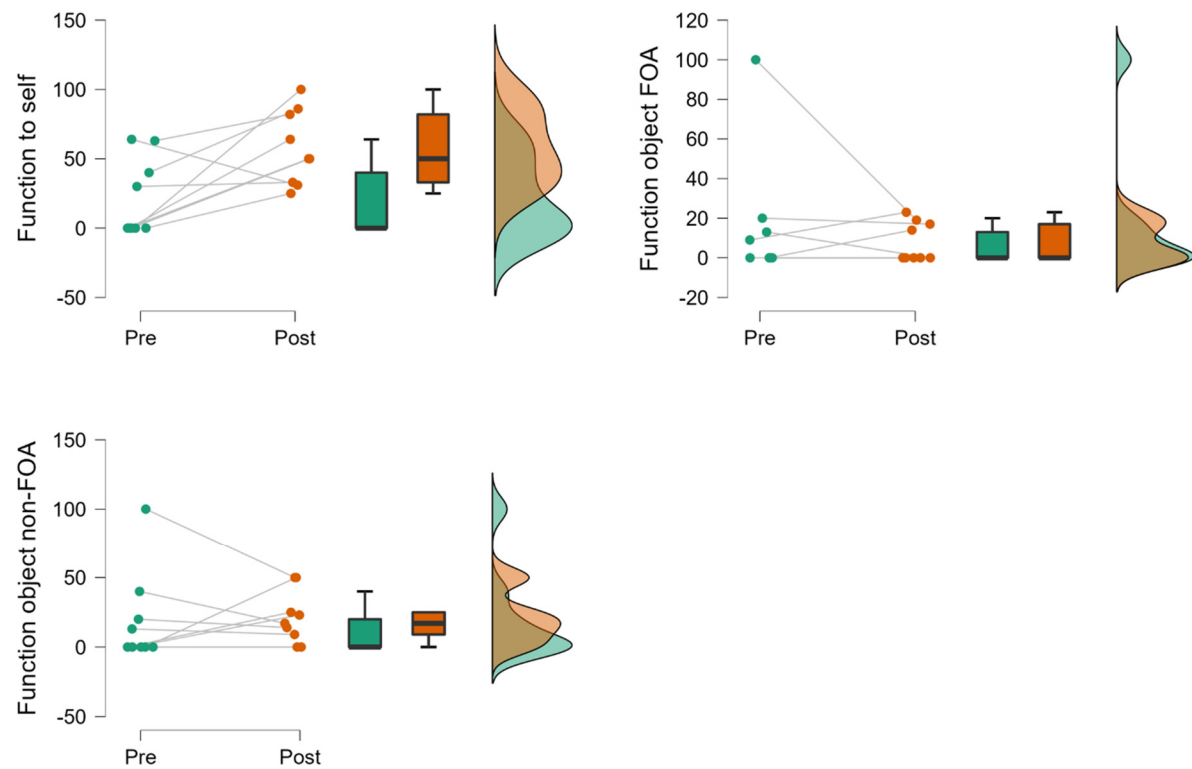

Figure S5: Participant-level raincloud plots showing changes from pre- to post-intervention for attention getting episodes and individual attention getting strategies

Note. AG = attention getting

Figure S6: Participant-level raincloud plots showing changes from pre- to post-intervention for function of attention getting episodes

Note. FOA = focus of attention

Figure S7: Participant-level raincloud plots showing changes from pre- to post-intervention for outcome of attention getting episodes to elicit infant visual attention to self

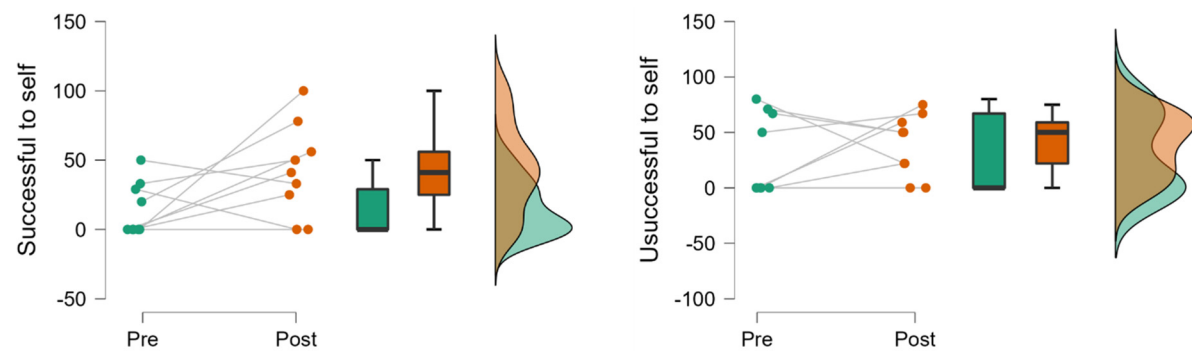

Figure S8: Participant-level raincloud plots showing changes from pre- to post-intervention for persistence
