

Figure S1. The results of multiplex ligation-dependent probe amplification (MLPA).

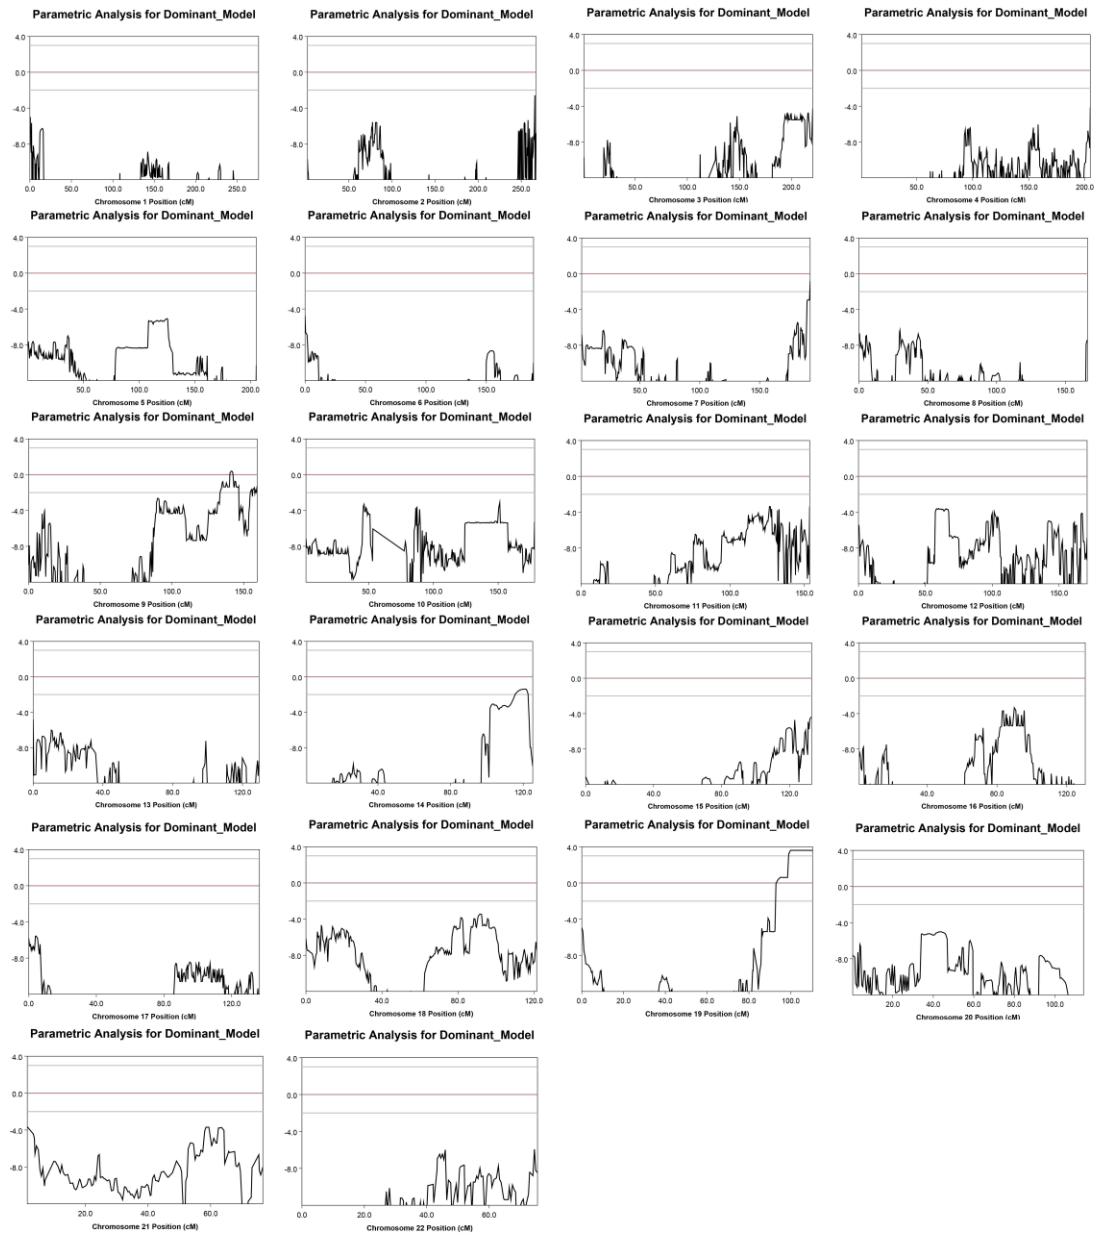

Figure S2. The parametric analysis of autosomal 1-22.

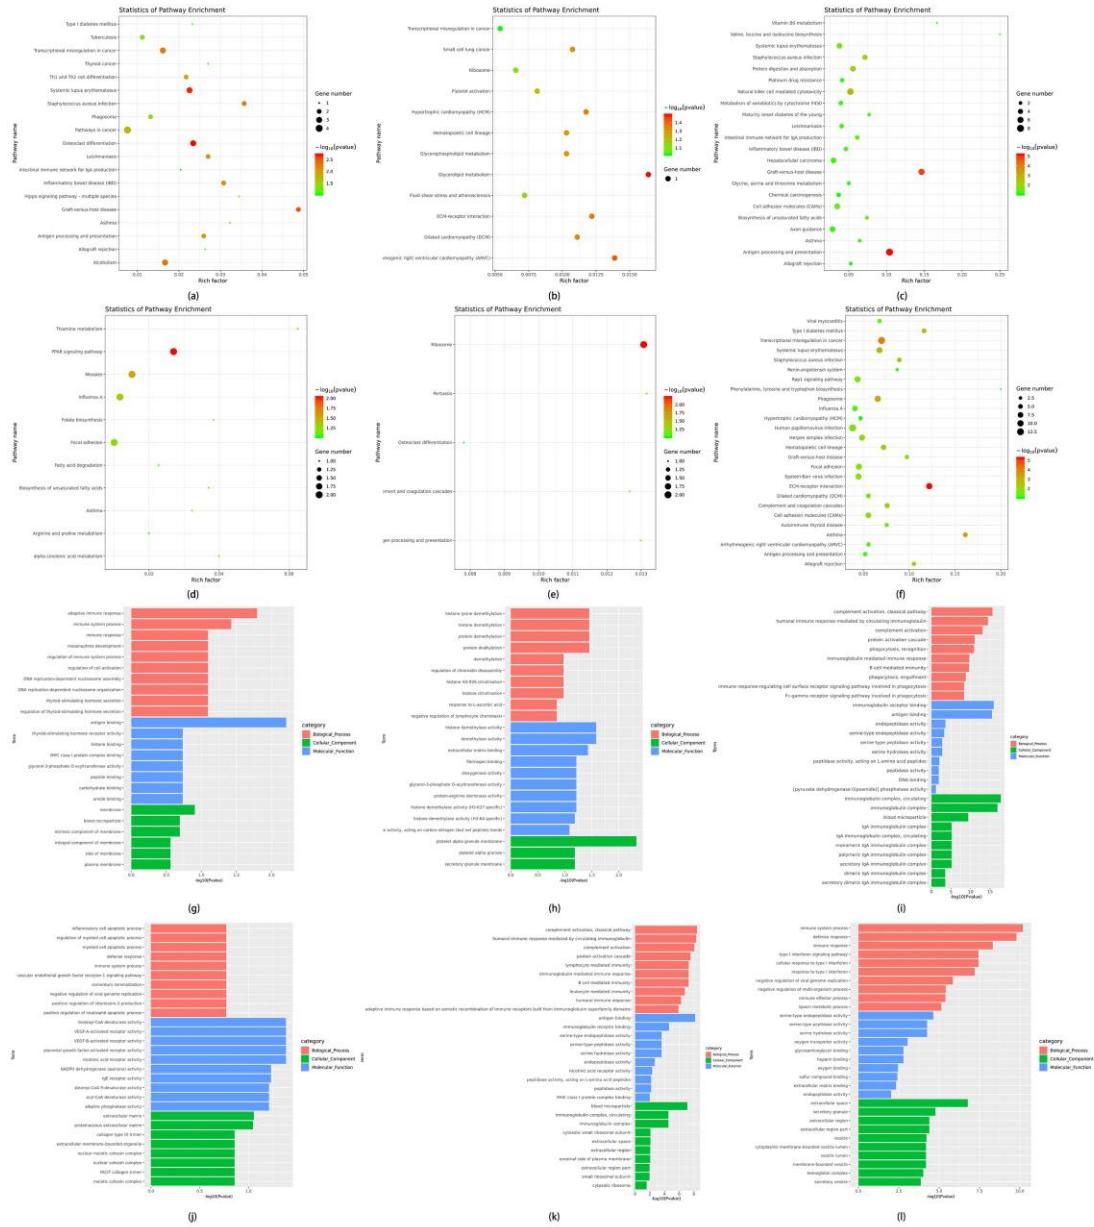

Figure S3. Gene oncology (GO) term and Kyoto encyclopaedia of genes and genomes (KEGG) function enrichment of differential expressive genes (DEGs) analysis. (a-c) and (g-i) represent the up-regulated gene and (d-f) and (j-l) represent the down-regulated genes. The left is the III-7 vs III-6, the middle is IV-5+IV-7 vs III-7 and the right row is IV-5+IV-7 vs III-6.

Table S1. Panel of next generation sequencing for fundus diseases
