The authors wish to make the following corrections to this paper [1].

The authors would like to clarify the Author Contributions section in order to avoid its being unintentionally vague and potentially confusing. Accordingly,

Author Contributions: P.H. and H.G. collected blood samples, performed FACS analyses, and conducted data analyses. M.B. and K.T.W. supported the flow-cytometric experiments. C.R., L.B., and C.T. contributed to data collection and analysis. A.K. and F.T. designed and supervised the study. P.H. and F.T. wrote the manuscript. All authors corrected and approved the manuscript.

should be replaced with

Author Contributions: P.H. and H.G. collected blood samples, performed FACS analyses, and conducted data analyses. M.B. and K.T.W. supported the flow-cytometric experiments. C.R., L.B., and C.T. contributed to data collection and analysis. A.K. and F.T. designed and supervised the study. P.H. drafted the manuscript and F.T. corrected the manuscript. All authors corrected and approved the manuscript.

The authors apologize for any inconvenience that these changes may have caused to the readers.
