Coronavirus disease 2019 (COVID-19)-related claims data

Claims were identified based on the following codes: MT043 (national disaster fundholding type 3/02), D6584 (real-time reverse transcription-polymerase chain reaction assays for COVID-19), B342 (coronavirus infection, unspecified site), B972 (coronavirus as the cause of diseases classified to other chapters), Z208 (contact with and exposure to other communicable diseases), Z290 (isolation), U18 (provisional assignment of new diseases of uncertain etiology or emergency use), U181 (novel coronavirus infection), Z038 (observation for other suspected diseases and conditions), Z115 (special screening examination for other viral diseases), and U071/072 (COVID-19). Furthermore, claims were reviewed for other COVID-19-related fee codes regarding admission, management, intensive care, isolation, community treatment center, screening clinic, and use of a negative pressure room.
