

Figure 1. Correlation of ascitic Interleukin 6 (IL-6_{ascites}) with ascitic polymorphonuclear neutrophils (PMN) in patients with spontaneous bacterial peritonitis (“SBP”, $n = 19$).

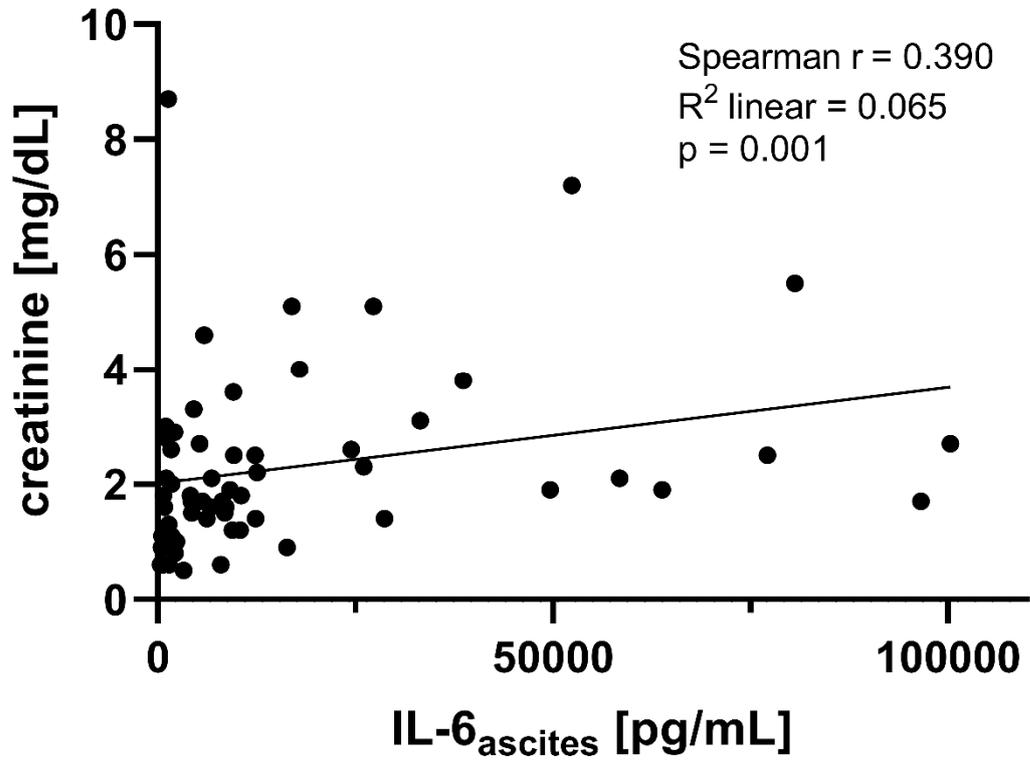

Figure S2: Correlation of ascitic Interleukin 6 (IL-6_{ascites}) ascitic with baseline creatinine

Figure S3: Predictive value of baseline ascitic Interleukin 6 (IL-6_{ascites}) compared to APACHE-II, SOFA, MELD, CTP and ACLF-Grade in identifying patients with need for hemodialysis therapy during ICU-stay
