

Figure S3: The correlations between STI (salt tolerance index) based on total dry weight (TDW) and shoot K^+ , root Ca^{2+} , shoot K^+/Na^+ ratio as well as root Na^+/Ca^{2+} ratio under salt stress (150 mM, 32 days). A) Correlation between STI and shoot K^+ content; B) correlation between STI and root Ca^{2+} content; C) correlation between STI and shoot K^+/Na^+ ratio; D) correlation between STI and root Na^+/Ca^{2+} ratio.
