

Supplementary Table S1. Somatic hybrids and backcross progenies selected for the assay of drought tolerance and their resistance to late blight in detached leaf assay (DLA), in a field (Δ rAUDPC) and results of resistance genes presence by using specific molecular markers (Rakosy-Tican et al. 2020); ND – not determined yet; SH – somatic hybrid; BC – back-cross; minus values of (Δ rAUDPC) indicate resistance; DLA on a scale from 1 to 9 where 1 is the most resistant.
