

1 Supporting information on the impact of OH-dyn on  
2 the expression of genes modulated by the copper  
3 compounds in BEAS-2B cells.

4

5

Figure S1. BEAS-2B cells were treated with the different copper compounds and OH-dyn for 8 h.  
Shown are mean values of four determinations derived from two independent experiments  $\pm$  SD.

6

7

**Table 1.** Impact of CuO NP (A) and CuO MP (B) on gene expression levels related to copper homeostasis, (oxidative) stress, DNA damage and inflammation in the absence or presence of OH-dyn. BEAS-2B cells were treated with the different copper compounds with or without OH-dyn for 8 h. Shown are mean values of four determinations derived from two independent experiments +/- SD.
