Rational Design for Electrochemical Analysis of a Red Phosphorus Electrode for Sodium-ion Batteries

Jong Hyuk Yun, San Moon, Do Kyung Kim* and Joo-Hyung Kim*

Figure S1. Procedure for fabrication of the red P@C NW electrode: (a) Electropolishing of the aluminum surface; (b) Preparation of porous alumina templates by the first-step anodization process; (c) Alumina etching process; (d) Preparation of porous alumina templates by a second-step anodization process.
