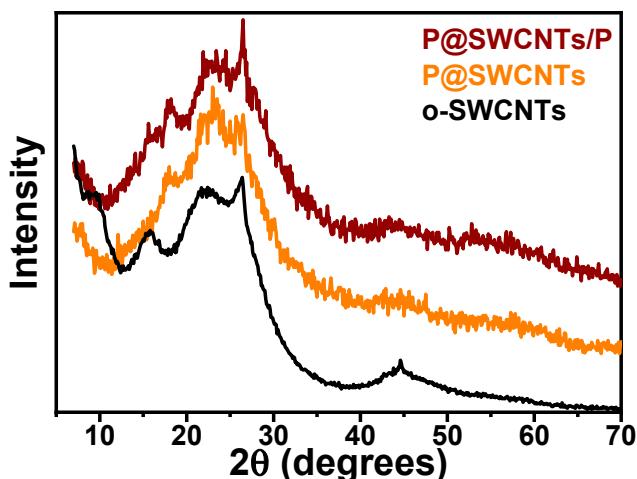

Figure S1. XRD patterns measured for initial o-SWCNTs and P@SWCNTs/P, P@SWCNTs samples.

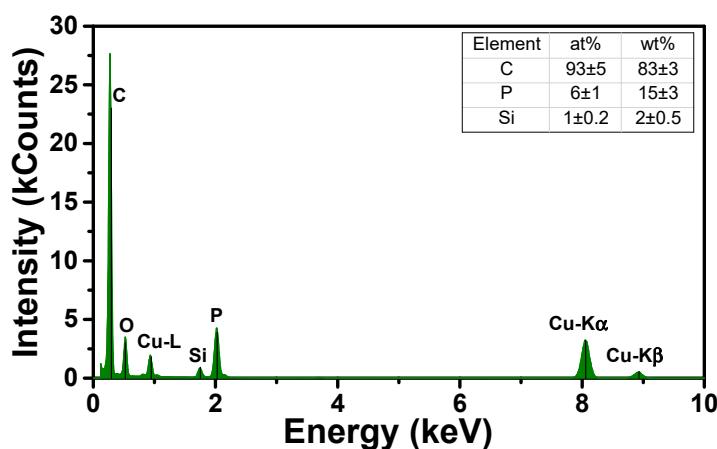

Figure S2. EDS analysis of P@SWCNTs sample. The spectrum and content of the main elements (inserted table). Cu and O are associated with the TEM grid, Si is impurity from the quartz ampoule.

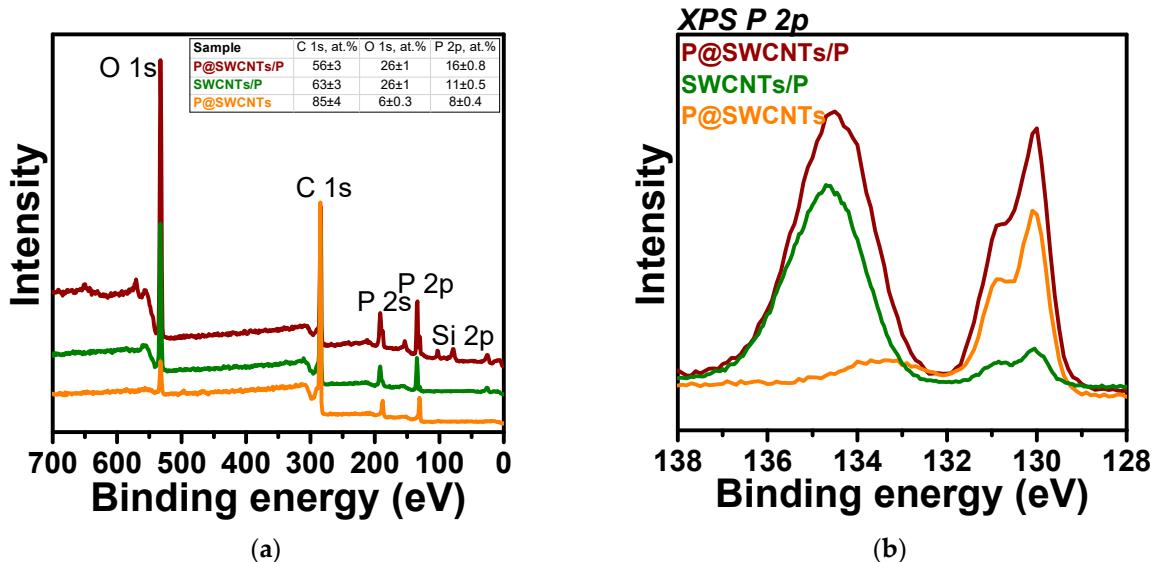

Figure S3. (a) Survey XPS spectra and (b) XPS P 2p spectra of P@SWCNTs (encapsulated phosphorus), SWCNTs/P (external phosphorus), and P@SWCNTs/P (encapsulated and external phosphorus). Inset shows the concentrations of carbon, oxygen, and phosphorus in the samples.

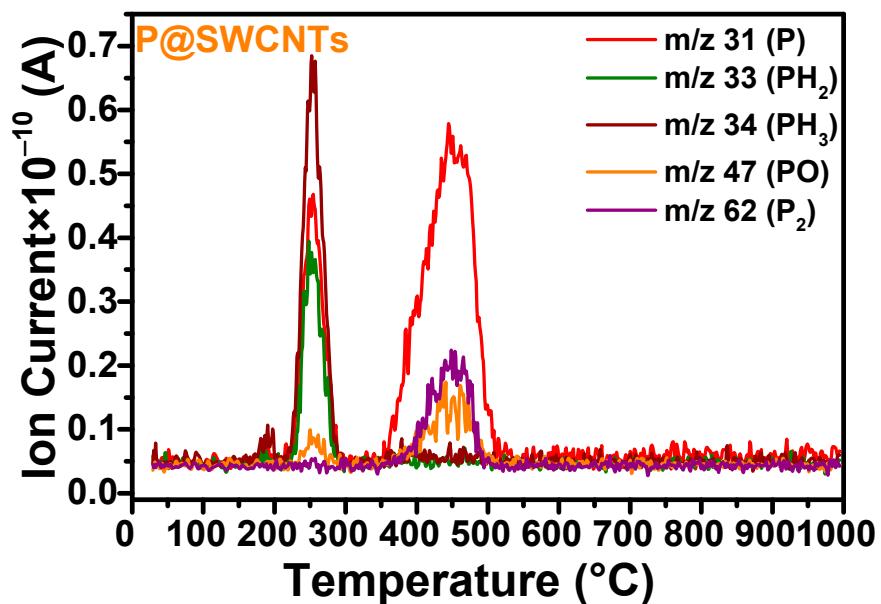

Figure S4. Ion current curves of evolved gases during decomposition of P@SWCNTs sample.

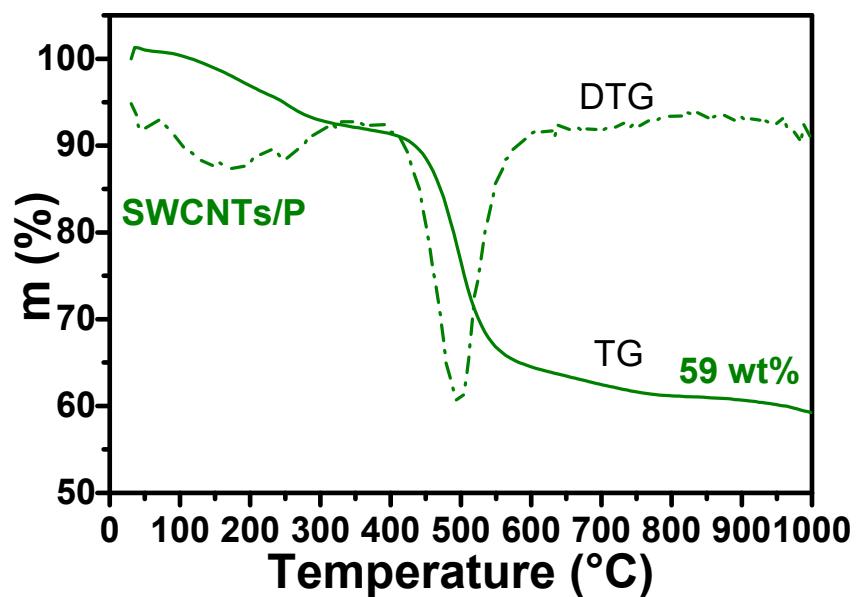

Figure S5. TG and DTG curves measured for SWCNTs/P in helium.

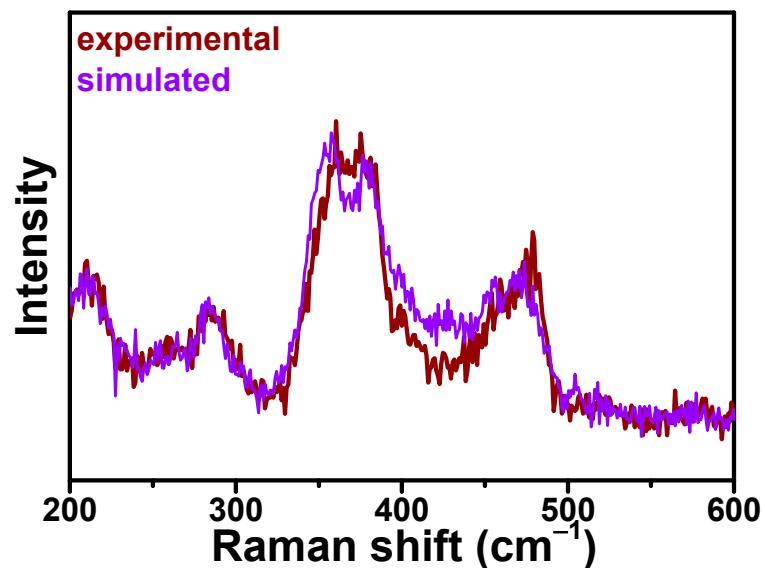

Figure S6. Experimental Raman spectrum of P@SWCNTs/P and the spectrum simulated using the spectra of recrystallized phosphorus P_{re} and P@SWCNTs in a ratio of 0.3 to 1.1.

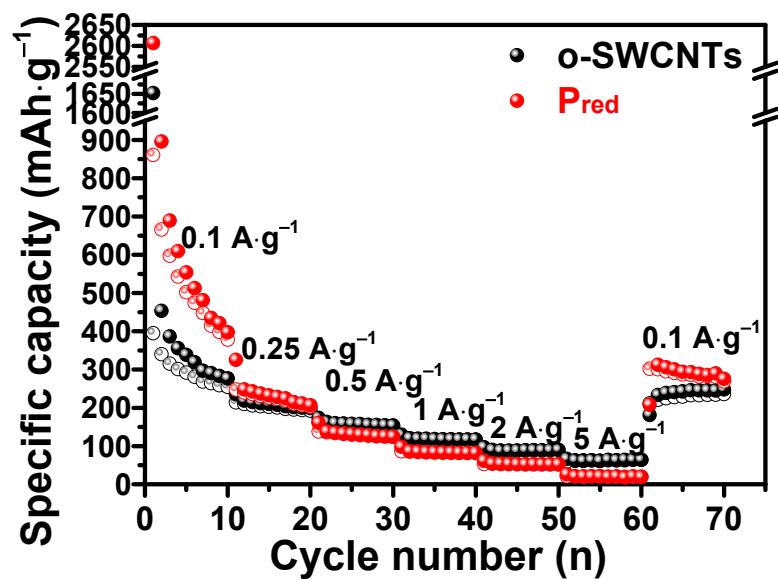

Figure S7. Rate performance of o-SWCNTs and commercial red phosphorus (P_{red}).

Table S1. Electrochemical performance of P–CNT composites in lithium-ion batteries.
