

Figure S1. The distributions of the number of genes by the number of splice variant assigned to a gene. **(a)** all (14427) detected genes; **(b)** 9235 genes randomly selected out of 14427 detected genes; **(c)** 4236 genes randomly selected out of 14427 detected genes; **(d)** 9235 genes with phenotype-specific expression; **(e)** 4236 genes with phenotype-specific expression of one or two splice variants.
