

Supplemental Materials

Table S1. Loading pattern of 96-well plate which mirrors the spotting pattern. Concentrations are given for Cy3 and Cy5 labeled oligonucleotides. Concentrations were given by the manufacturer and checked via Nanodrop.

# ID	Well	c _{Cy5} [μ M]	c _{Cy3} [μ M]	# ID	Well	c _{Cy5} [μ M]	c _{Cy3} [μ M]

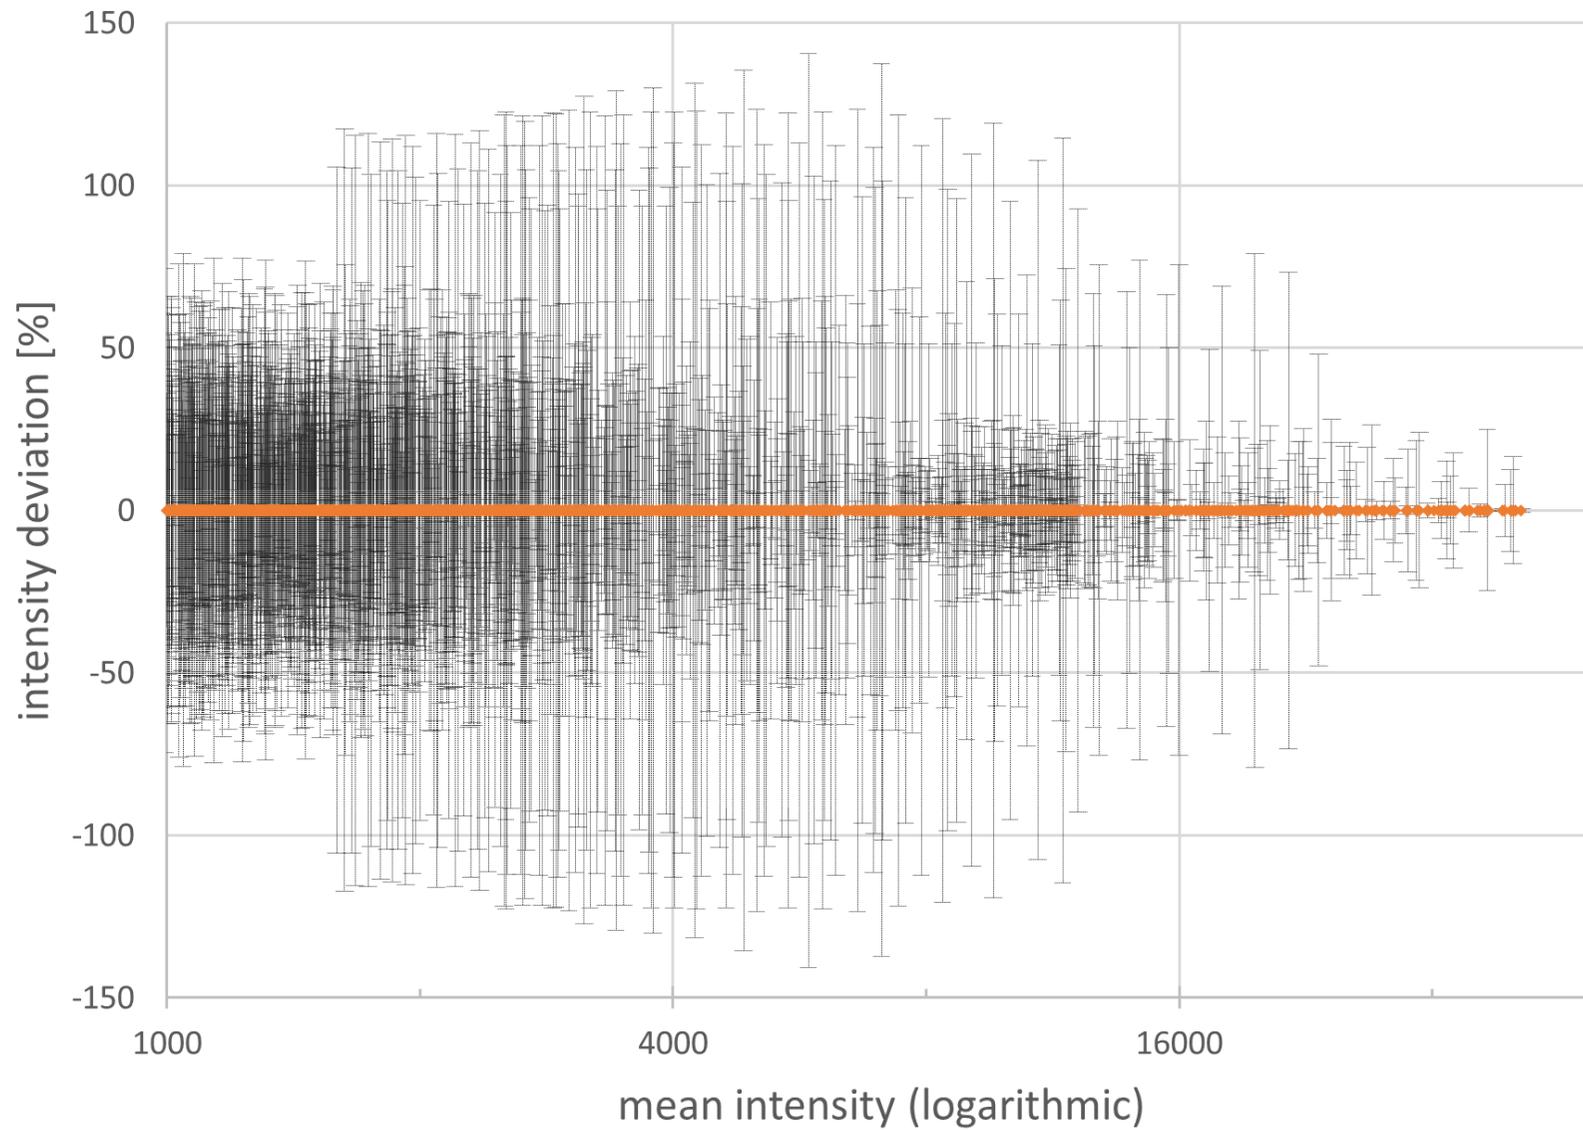

Figure S1. Cy5-intensity pattern heterogeneity of replicate spots. The mean intensities of replicate-spot-groups are displayed with given percent intensity deviation.

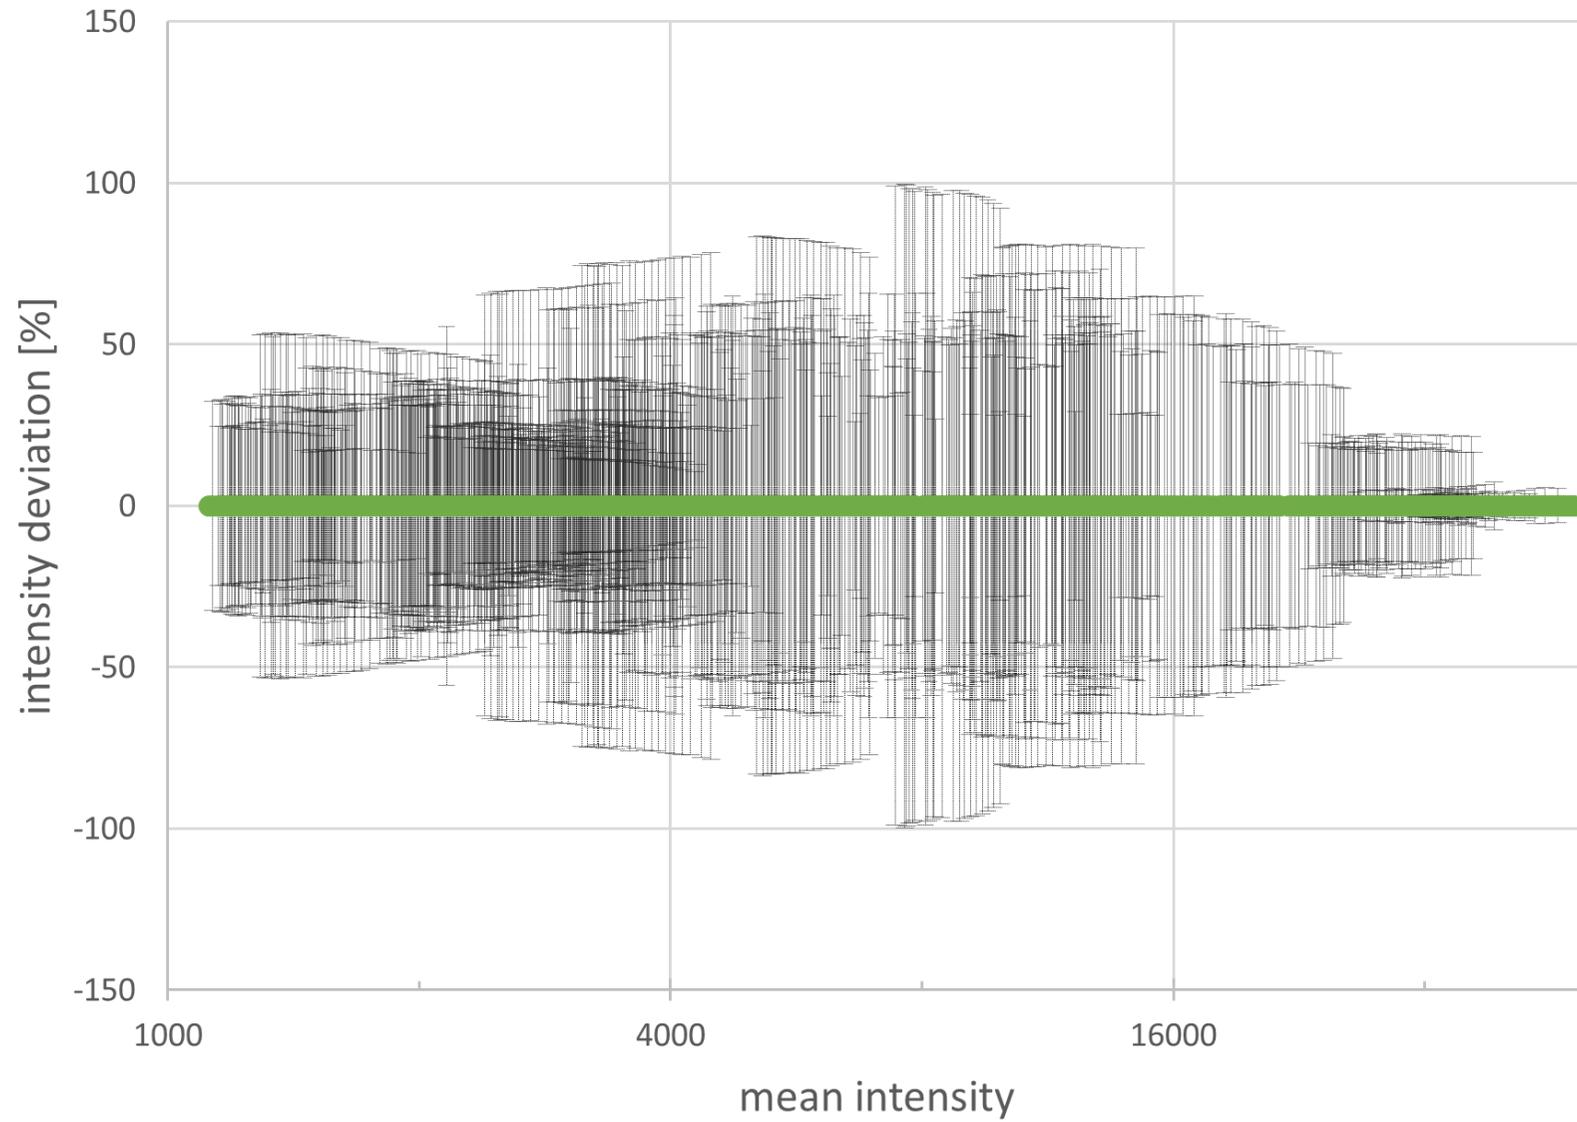

Figure S2. Cy3-intensity pattern heterogeneity of replicate spots. The mean intensities of replicate-spot-groups are displayed with given percent intensity deviation.
