Note: "Is SCP currently addressed in existing national policies? If yes, please indicate the focus of this/these national policies." Standard error in parenthesis. $p < 0.001^{***}$, 0.01^{**} , 0.05^{*} , $0.1\#$. $n = 46$. LPM: Linear probability model. Logit: Logit model. Dependent variables are dummy variables on the existence of each sectoral policy addressing SCP (1: Yes, 0: No). A response from the European Union was excluded from this analysis because it cannot be classified by income level. Source: authors based on data from the Global Survey on National SCP Policies and Initiatives

Table S2. The effects of the cross-sectoral policies incorporating SCP on the sectoral policies addressing SCP, controlling for income level and region (part 2)

Dependent variable		Environment Protec./conserv.		Industrial/ Economic Dev.		Urban Planning/Dev.		Poverty alleviation		Other
