Correction

Correction: Wu et al. Accumulatively Increasing Sensitivity of Ultrawide Instantaneous Bandwidth Digital Receiver with Fine Time and Frequency Resolution for Weak Signal Detection. *Electronics* 2022, *11*, 1018

Chen Wu *, Taiwen Tang, Janaka Elangage and Denesh Krishnasamy

Defence Research and Development Canada, Ottawa Research Centre, Ottawa, ON K1A 0Z4, Canada; taiwen.tang@forces.gc.ca (T.T.); janaka.elangage@forces.gc.ca (J.E.); denesh.krishnasamy@forces.gc.ca (D.K.)
* Correspondence: chen.wu@forces.gc.ca

In the original publication [1], there were two typos found in Section 3 Equation (1) and Table 3. The time domain values N and M have been incorrectly noted and should be updated as $N-1$ and $M-1$. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

Please find the renewed Equation (1) and Table 3 as follows:

$$X(v) = \sum_{n=0}^{N-1} x(n) W_N^{nv} \quad (1)$$

Table 3. The relation between the time-index u in each time-slot and the overall sampled data.

Time-Slot	0	1	⋯	k	⋯	$K-1$
u $n\,(=u+kM)$	$0, 1, \ldots M-1$	$M, M+1, \ldots 2M-1$		$0, 1, 2, 3, \ldots\ldots M-1$ $kM, kM+1, \ldots (k+1)M-1$		$(K-1)M, (K-1)M+1, \ldots N-1$
