

**Figure S1** The total ion chromatograms (TIC) of *Dendrobium officinale* QC samples: (a) positive ESI mode; (b) negative ESI mode.

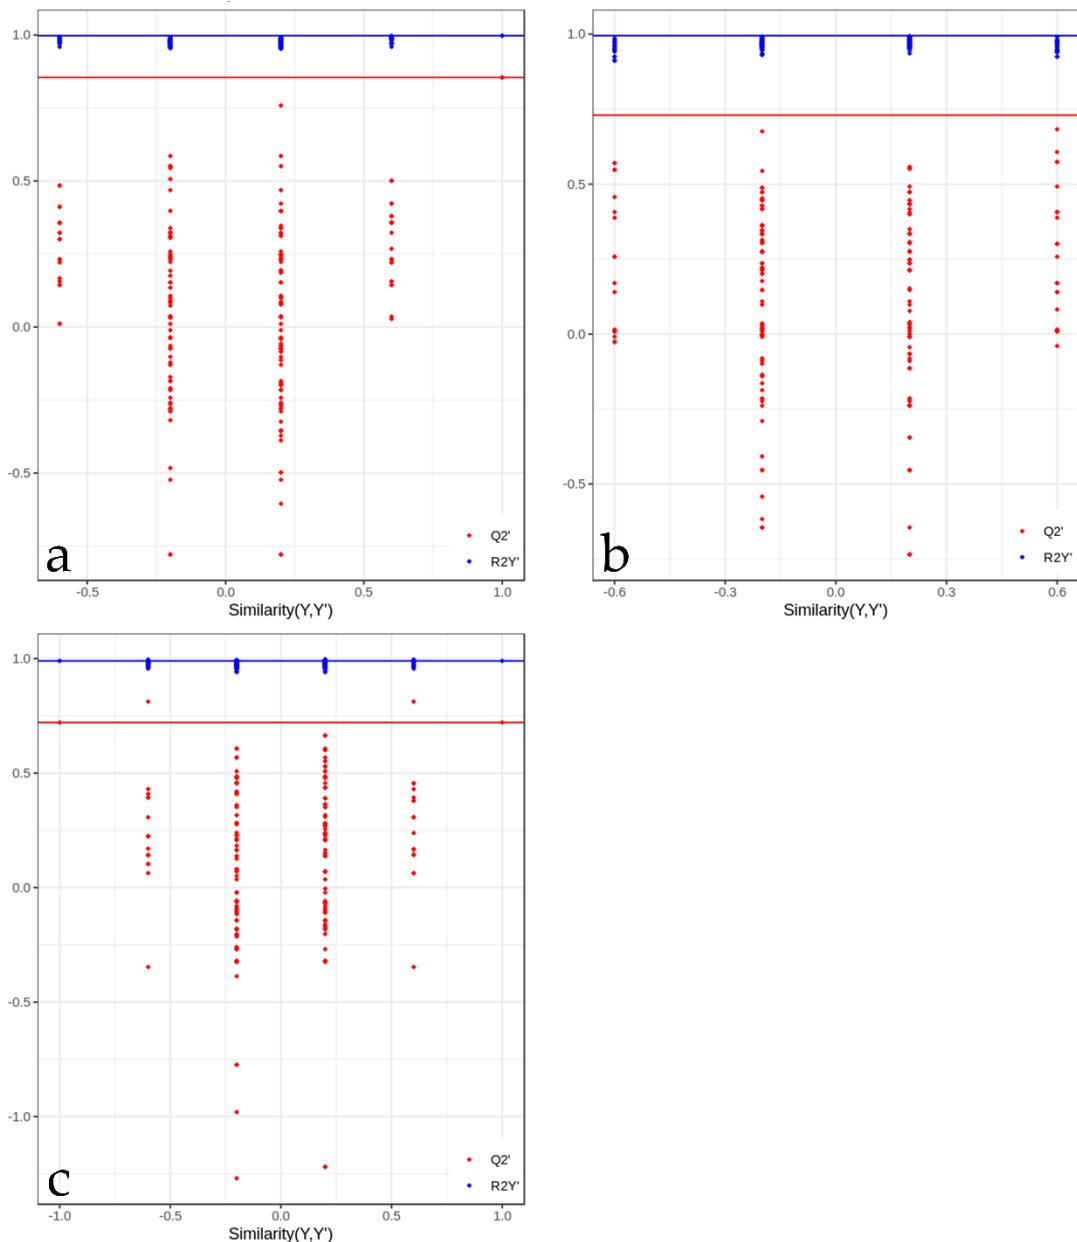

Figure S2 Plots of permutation tests on OPLS-DA models. The horizontal lines represented the parameters calculated in the original OPLS-DA model, the red and blue represented R<sup>2</sup>Y and Q<sup>2</sup>, respectively. The dots were the parameters calculated by permutation tests, the red dots were R<sup>2</sup>Y' and the blue were Q<sup>2</sup>'.
