Supplemental Table 1. Overview of the patients. P1 and P2 (green background) were temporarily treated with dasatinib. (Pro Re Nata (PRN): administration timing of prescribed medication is left to the patient/caregiver.)

subjects	sex	age (years)	main clinical characteristics	disease duration (years)	medication
P1	male	34	drug resistant epilepsy, mild chorea, tics, cognitive impairment, peripheral neuropathy, myopathy	11	lacosamide 550 mg/day, zonisamide 300 mg/day, perampanel 4 mg/day, vitamin D, PRN: lorazepam/midazolam [Dasatinib 80 mg/day]
P2	male	29	drug resistant epilepsy, mild chorea, tics, cognitive impairment, irritability, anxiety, depression, psychosis	15	lacosamide 600 mg/day, zonisamide 400 mg/day, mirtazapine 15 mg/day, olanzapine 2.5 mg/day, vitamin D, PRN: lorazepam/midazolam [Dasatinib 80 mg/day]
P3	male	53	parkinsonism, dystonia, dysarthria, peripheral, neuropathy, depression	15	scopoderm transdermal therapeutic system/day
P4	female	51	epilepsy, parkinsonism, dystonia, dysarthria, peripheral neuropathy, cognitive impairment	30	levetiracetam 4 g/day, valproate 2 g/day, clobazam 10 mg/day, zonisamide 200 mg/day, vitamin D
P5	male	54	epilepsy, parkinsonism, dystonia, dysarthria, dysphagia, peripheral neuropathy, cognitive impairment	21	lamotrigine 110 mg/day, oxcarbazepine 1.5 g/day, lacosamide 300 mg/day, levodopa 300 mg/day, esomeprazole 40 mg/day
P6	male	42	epilepsy, feeding dystonia, orofacial dyskinesia, chorea, peripheral neuropathy, myopathy, impulse control disorder	12	levetiracetame 1 g/day, quetiapine 400 mg/day, ramipril 2.5 mg/day, metoprolol 47.5 mg/day, PRN: metamizole, ibuprofen, pantoprazole
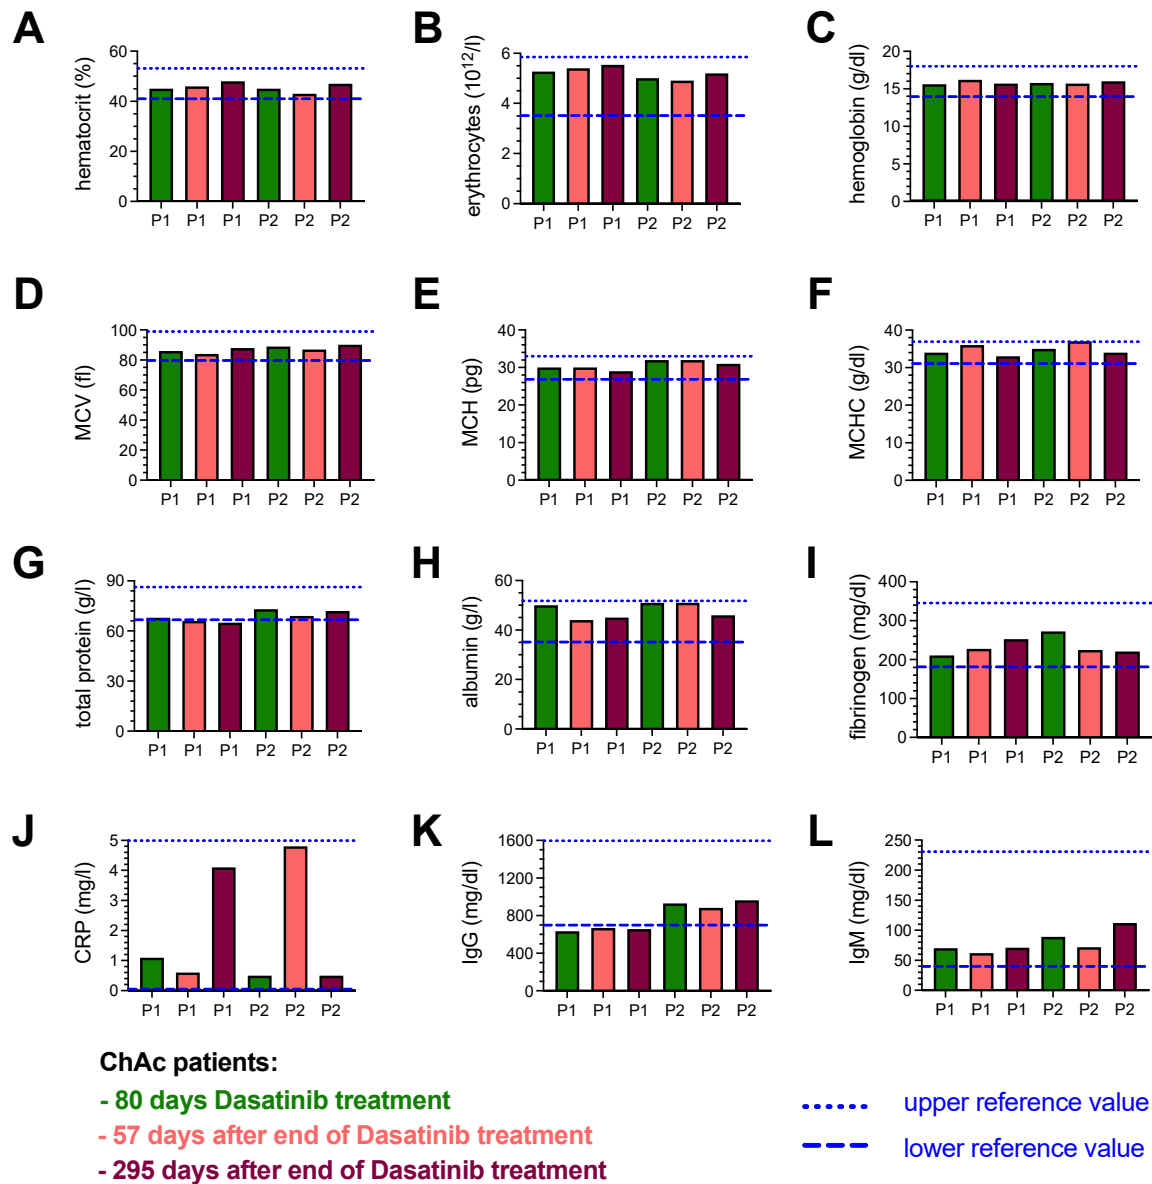

Supplemental Figure S1. Clinical laboratory parameters of the two ChAc patients at different sampling time points as indicated by the panel legend. The blue lines represent healthy reference values. The dotted lines mark the upper and the dashed line the lower limits of normal, respectively. (**A**) Hematrocrit value, (**B**) Erythrocyte number, (**C**) Hemoglobin concentration, (**D**) Mean cellular volume (MCV), (**E**) Mean cellular hemoglobin (MCH), (**F**) Mean cellular hemoglobin concentration (MCHC), (**G**) Total plasma protein, (**H**) Plasma albumin, (**I**) Plasma fibrinogen, (**J**) C-reactive protein (CRP), (**K**) Immunoglobulin G (IgG), (**L**) Immunoglobulin M (IgM).
