

SUPPORTING INFORMATION

Table S1. Berry, pulp, skin, and seed parameters evaluated by tasters and the scores given to evaluate the taste and the sensory parameters of Monastrell grapes.

BERRY	1	2	3	4
Crushability	Hard, it breaks only with strong pressure	It deforms, slightly elastic	It deforms slightly but returns to the initial form	Weak grain
Easy of peeling	Strongly adhering pedicel	Attached pedicel that comes off easily	Pedicel that comes off relatively easily	Pedicel that comes off very easily
PULP	1	2	3	4
Adherence	Pulp strongly adhering to the skin	Layer of the attached and visible pulp	Fine stratum of the pulp poorly visible	No release of juice when chewing
Sweetness	Little sweetness	Moderately sweet	Sweet	Very sweet
Acidity	Low	Mildly acidic	Acidic	Very acidic
SKIN	1	2	3	4
Maceration	Very hard	Moderately hard	Easily crushed	Fragile
Tannic Intensity	Very low	Quite low	Moderately high	High
Astringency	Very low	Quite low	Moderately low	High
SEEDS	1	2	3	4
Color	White or greenish-yellow	Greenish-brown	Dark gray	Dark brown
Crushability	Hard	First softness, then hard seed	It breaks quite easily	Fragile and crispy
Aroma	Unable to be tasted	Green or herbaceous	Toasted	Roasted

Table S2. The scores obtained in the tasting and sensory analysis of the berries, for five different rootstocks (140Ru, 1103P, 41B, 110R, and 161-49C) and two different irrigation strategies (PRI and RDI), in 2015.
