b.

c.

**Figure S2.** GLS\_net\_pv performance (a) GLS\_net\_pv performance upon the PV training set across 5 runs of 10 epochs (b) GLS\_net\_pv performance upon the PV testing set across 5 runs of 10 epochs (c) Best GLS\_net\_pv performance upon the PV training and testing set across 10 epochs.

**Table S1.** Detailed leafRCNN performance upon the IFL testing set

Metric	IoU	maxDets	maxDets	Score
<b>Bounding Box</b>				
Average Precision	0.50:0.95	all	100	0.990
Average Precision	0.50	all	100	0.899
Average Precision	0.75	all	100	0.990
Average Precision	0.50:0.95	small	100	0.990
Average Precision	0.50:0.95	med	100	0.899
Average Precision	0.50:0.95	large	100	0.990
Average Recall	0.50:0.95	all	1	0.990
Average Recall	0.50:0.95	small	100	0.899
Average Recall	0.50:0.95	med	100	0.990
Average Recall	0.50:0.95	large	100	0.939
<b>Segmentation (Mask)</b>				
Average Precision	0.50:0.95	all	100	0.923
Average Precision	0.50	all	100	1.000
Average Precision	0.75	all	100	0.977
Average Precision	0.50:0.95	large	100	0.923
Average Recall	0.50:0.95	all	1	0.942
Average Recall	0.50:0.95	large	100	0.944

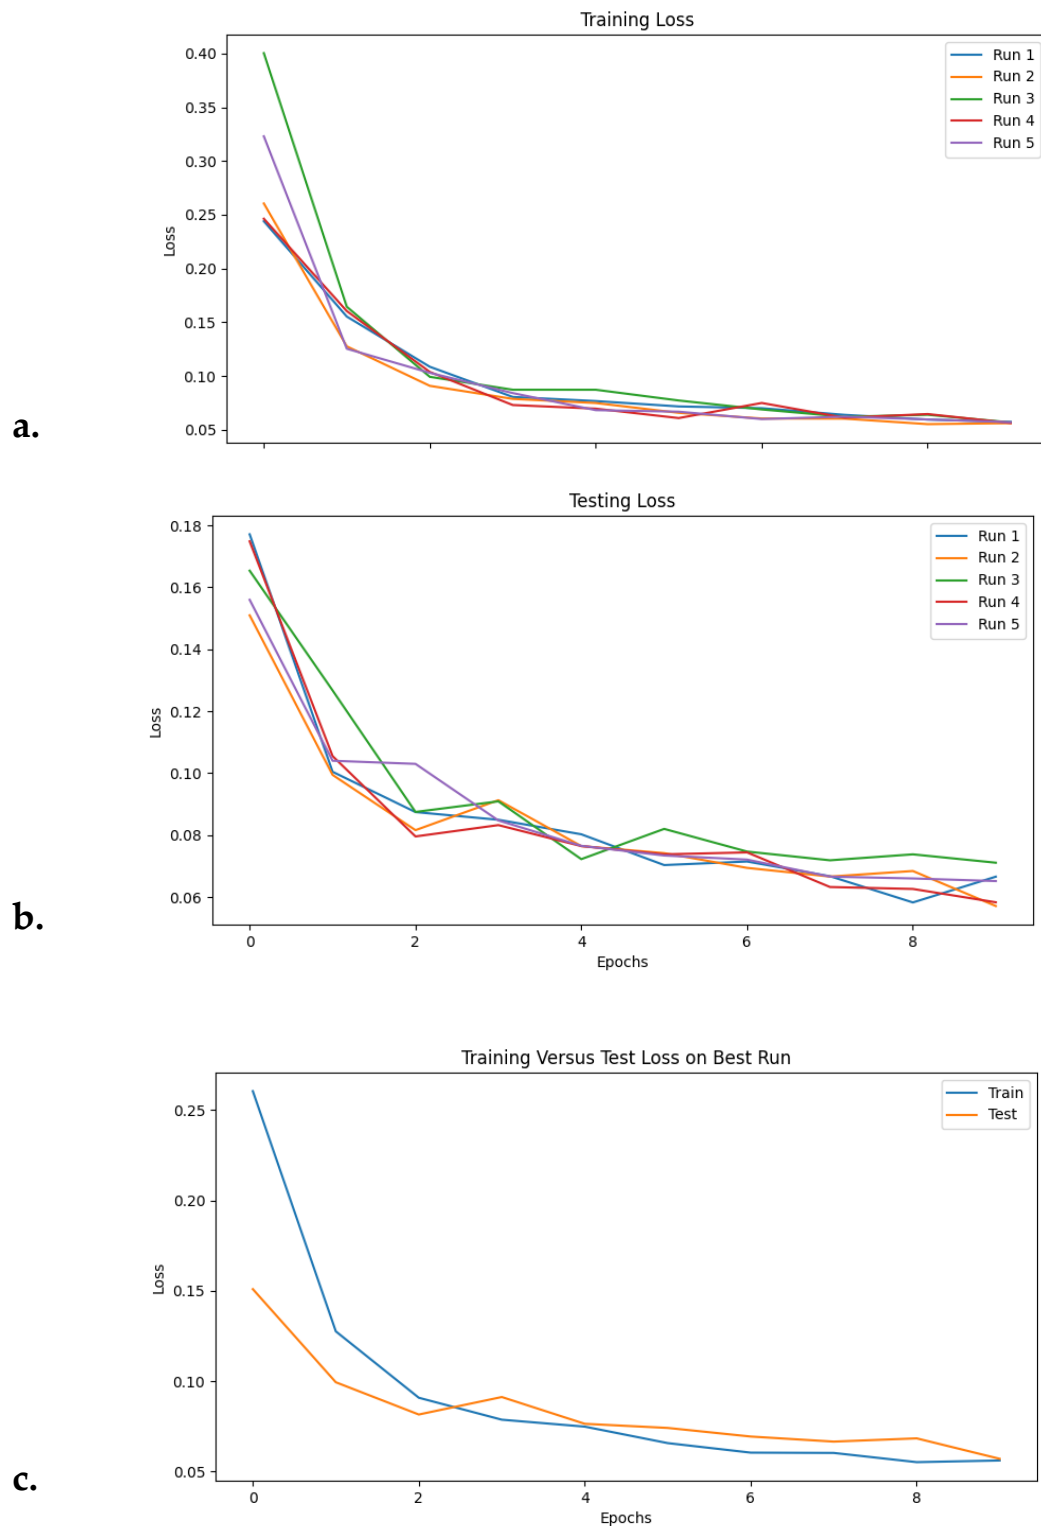

**Area** = Indicates the area in which AR and AP values were calculated. Since leaves in the IFL dataset are quite large and take up most of the area in a image, only AP and AR values for the entire image are shown here

**maxDets** = The maximum number of predicted instances that will be considered. For example: An image may contain 400 predicted instances of class A. Of these, 100 instances of class A will be randomly selected and assessed. The IFL dataset only contains a single instance in each image.

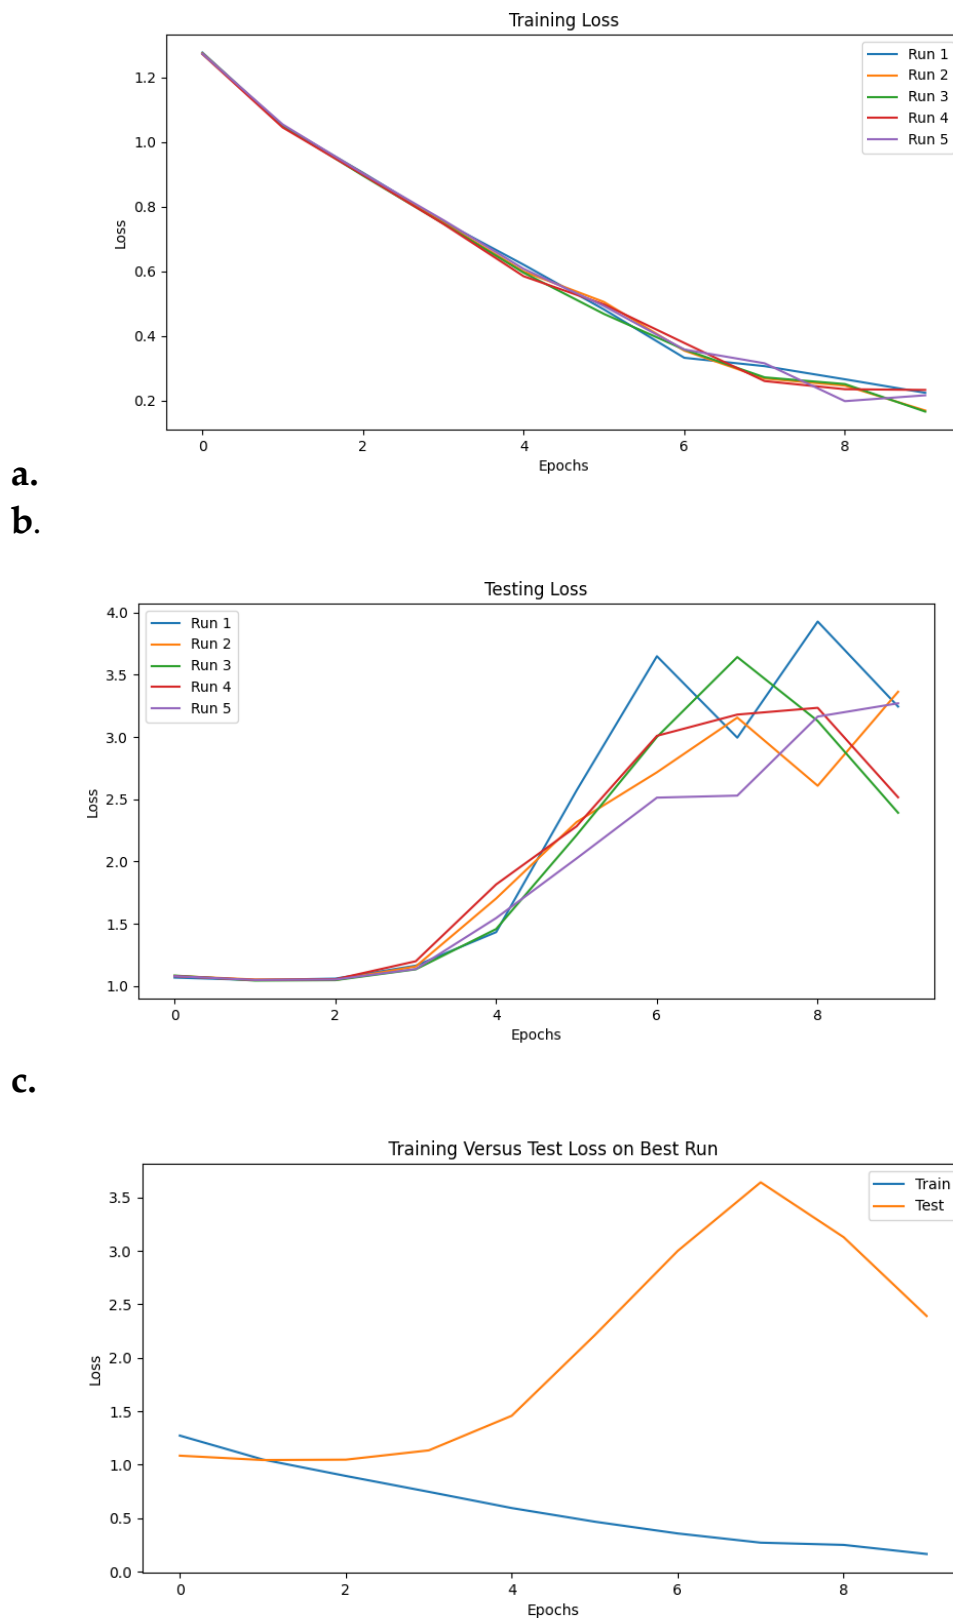

**Table S2.** leafRCNN loss upon the IFL testing set

Best Loss*	Average Best Loss*	Best Loss Standard Deviation*
0.0571	0.062	0.0308

\*Results are from five separate runs of 10 epochs each.

**Figure S3.** leafRCNN performance. (a) leafRCNN performance upon the IFL testing set across 5 separate runs of 10 epochs (b) leafRCNN performance upon the IFL training set across 5 separate runs of 10 epochs (c) Best leafRCNN model performance upon the IFL testing and training set across 10 epochs.

**Figure S4.** GLS\_net\_noBackground performance (a) GLS\_net\_noBackground performance upon the IFNB training set across 5 runs of 10 epochs. (b) GLS\_net\_noBackground performance upon the IFNB testing set across 5 runs of 10 epochs. (c) Best GLS\_net\_noBackground performance upon the IFNB training and testing set across 10 epochs.
