

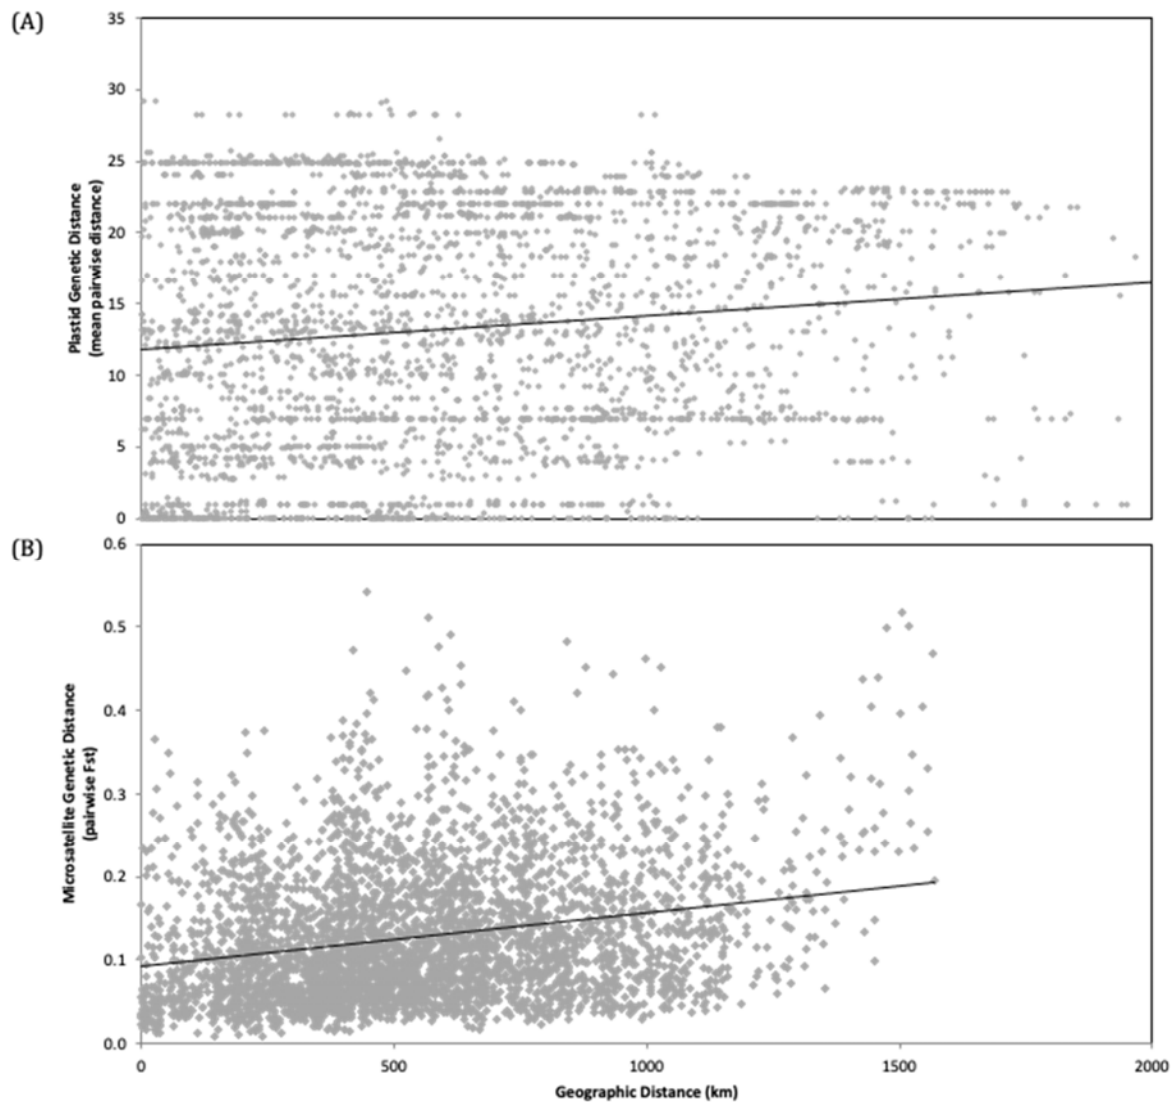

Figure S3. Correlation between geographic and genetic distances in *Lobelia siphilitica* based on (A) mean pairwise differences using 13 plastid haplogroups (Mantel correlation, $r = 0.112$, $df = 81$, $P = 0.01$) and (B) pairwise F_{ST} using nuclear microsatellite data (Mantel correlation, $r = 0.246$, $df = 88$, $P = 0.01$).
